MISSOURI DEPARTMENT OF NATURAL RESOURCES

Monthly Air Pollution Control Program Summary Report
Regional Office Concerns Received or Investigated
Between April 16, 2026, and June 15, 2026

Concern Types Received During Report Period

	Total
Total	311
Agricultural Anhydrous Ammonia	0
Asbestos	24
Fugitive Particulate Matter	20
Hazardous Air Pollutant Release	8
Odor	135
Open Burning	78
Other	41
Particulates	5

Note: Concern Type refers to the air category the concern falls under. There may be more than one type associated with an individual concern; therefore, the totals listed here may not reflect the total number of concerns received during the reporting period.

Number of Referral Notices of Violation (RNOV) Issued: 1

Number of Notices of Violation (NOV) Issued: 1

Number of Letters of Warning (LOW) Issued: 10

Number of Letters of Unsatisfactory Findings (UF) Issued: 16

Concerns Investigated During Report Period

	Total
Total	303
Concerns Received Before Report Period	17
Concerns Received During Report Period	286

Note: Concern Info refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations made. Those statements of allegations do not necessarily reflect the legal standard upon which inspections would be made.

Monthly Air Pollution Control Program Detail Report
Regional Office Concerns Received or Investigated
Between April 16, 2026, and June 15, 2026

Concern No.	Received Date	Investigation Date	Suspected Source Owner/Operator	Concern Type(s)	City/County	Region	Inspector Initials	Final Action
65762	04/10/2026	04/16/2026	Dylan Burns	Odor	Jasper /Jasper	SWRO	JW	Phone Conversation

Concerned Party: Doug Probert

Concern Info: Caller states that there is excessive odor from Midwest Organic Solutions drifting onto his property at 7:45 a.m. on Friday. [sic]

Conclusions: CON-2337
I did not observe any violations during this investigation. No action is required.

Concern No.	Received Date	Investigation Date	Suspected Source Owner/Operator	Concern Type(s)	City/County	Region	Inspector Initials	Final Action
65772	04/10/2026	04/16/2026	Dylan Burns	Odor	Jasper /Jasper	SWRO	JW	Phone Conversation

Concerned Party: Shawna Farmer

Concern Info: date of Incident: 1/7/2026
"This smell has been on going for some time now. Its making us sick and puking, even if our doors are closed, we can be in our yard. This is a health hazard and needs to be addressed ASAP. I know yall can smell it, I mean half of jasper has complained several times. THIS IS AFFECTING PEOPLE BREATHING ITS A HEALTH ISSUE... [sic]

Conclusions: CON-2348
I did not observe any violations during this investigation. No action is required.

Concern No.	Received Date	Investigation Date	Suspected Source Owner/Operator	Concern Type(s)	City/County	Region	Inspector Initials	Final Action
65774	04/10/2026	04/16/2026	Dylan Burns	Odor	Jasper /Jasper	SWRO	JW	Phone Conversation

Concerned Party: Warren Gray

Concern Info: Date of Incident or Date First Noticed: 1/7/2026
Smell makes you wanna puke everytime you walk outside. Its causing breathing problems and our inside of house is smelling bad as well. Today is awful yall need to come out to our address which is given and use your meter to see how bad the smell is. This has been on going and its ridiculous how people do not wanna address the health concerns and environmental concerns. [sic]

Conclusions: CON-2350
I did not observe any violations during this investigation. No action is required.

Concern No.	Received Date	Investigation Date	Suspected Source Owner/Operator	Concern Type(s)	City/County	Region	Inspector Initials	Final Action
65775	04/11/2026	04/16/2026	Kimberley Taylor	Open Burning Open Dumps	Sarcoxie /Jasper	SWRO	JW	Communication In Person

Concerned Party: Anonymous

Concern Info: There is a residence at 7700 BlackBerry Road, Sarcoxie, MO (little white trailer).

That has been burning large piles of garbage and who knows what, and now as of 04/11/26 (started a burn 04/10/26 in the evening), there is a foul, terrible smell in the air and inside of the residence. Could be plastic, or worse. They burn behind their property. Large piles of garbage (I don't believe they pay for a trash service)

They also always have loose animals and garbage all over their yard, that flies into the road and onto nearby properties.

I believe they need to be investigated. These concerns have gone on for some time. But this burning and smell as of today is too foul [sic]

Conclusions: CON-2355
I did not observe any violations during this investigation. No action is required.

65777	04/10/2026	04/16/2026	Dylan Burns	Odor	Jasper /Jasper	SWRO	JW	Phone Conversation

Concerned Party: Lindsey Tidball

Concern Info: "The smell is horrible. I don't even live by the facility but it can't go outside when it smells like this nor can my children. To best describe the smell it's like rotten, animal, puke, death. It's thick in the air. Absolutely horrible" [sic]

Conclusions: CON-2344
I did not observe any violations during this investigation. No action is required.

65810	04/13/2026	04/17/2026	Walt Collins	Open Burning	Rockaway Beach /Taney	SWRO	BS	Phone Conversation

Concerned Party: Anonymous

Concern Info: CP states this residence is trying to clean up the property through burning the solid waste in the yard. There is a strong plastic odor, and the fire is generating a lot of smoke. The plastics include children's toy and other wastes; pile is being moved around being hard to identify what exactly is being burnt. [sic]

Conclusions: CON-2376
No violations of 10 CSR 10-6.045 Open Burning Requirements were observed during the site investigation. No further action is required

65816	04/14/2026	04/16/2026	Dylan Burns	Odor	Jasper /Jasper	SWRO	JW	Phone Conversation

Concerned Party: Matthew Newman

Concern Info: From Web: Continued illegal dumping of solid waste in an outdoor environment on bare soil, creating hazardous and horrendous odor. Currently smells in our garage/house tonight (4/13/26). If unpermited dumping, it is a class E felony in the state of Missouri that has been occurring since at least 1/3/26. One neighbor hospitalized thus far with respiratory distress, and another treated as an outpatient. [sic]

Conclusions: CON-2390
I did not observe any violations during this investigation. No action is required.

65820	04/14/2026	04/17/2026	Martin Montague	Open Burning	Eagle Rock /Barry	SWRO	JW	Communication In Person

Concerned Party: Ashlee Vineyard

Concern Info: Caller states that her neighbor, Martin Montague, has burned plastic and appliances for four days in a row, starting on Friday night (April 10). Montague has continued burning and dumping solid waste despite previous department involvement (see ACE #62592). The caller mentioned that Montague has begun tearing down the remaining debris from a mobile home that burned down on the property sometime before 2024. [sic]

Conclusions: CON-2394
I did not observe any violations during this investigation. No action is required. The findings of this investigation show that the property owner resolved the required actions of the Compliance Schedule that was signed as part of ACE# 62592.

Concern No.	Received Date	Investigation Date	Suspected Source Owner/Operator	Concern Type(s)	City/County	Region	Inspector Initials	Final Action
65847	04/14/2026	04/16/2026	Mike (Name of individual for the demo)	Asbestos Open Dumps: Construction and Demolition	Edwards /Benton	KCRO	MS	Phone Conversation RTC, UF

Concerned Party: Jermy Wood

Concern Info: A contractor was hired to demo a home and dumping all the waste from the demo onto the neighboring property. Worried about asbestos and lead and worried and stated they have not done. They have not been handling the waste correctly. [sic]

Conclusions: Letter of Unsatisfactory Findings is being sent to the owners of the property to facilitate cleanup of the site. Heather, Donna, Albert, Debbie Cormack.

65848	04/15/2026	04/17/2026	Missouri Organic Recycling	Odor	Liberty /Clay	KCRO	CK	Phone Conversation

Concerned Party: Delbert gaddis

Concern Info: From Webform email - New Report an Environmental Concern 78226 - Submitted at 4:00 pm Wednesday, April 15, 2026. Date of Incident or Date First Noticed 03/19/2026

Missouri organic recycling located at 5923 Nebo Hills Rd , Liberty, Mo . We can’t go outside due to the odor coming from this establishment. It has been stinking for 5 days straight now. In the past the odor would come and go but it is horrific. We’ve been to the location in the past and they apparently think it’s my problem NOT theirs. It literally smells like sour mold. Take 291 to old 210hwy heading east you won’t miss it just roll down your window! [sic]

Conclusions: The odor at Missouri Organic was confirmed to be at or above the regulatory threshold. Facility will be issued an Unsatisfactory Findings and must provide a plan to mitigate the odor in a timely manner in order to return to compliance.

65860	04/10/2026	04/16/2026	Dunklin County PWSD #3 South (Rusty Moore)	Particulates Bacteria in Water	Kennett /Dunklin	SERO	MW	Communication In Person

Concerned Party: Anonymous

Concern Info: Water has sediment, unsafe ? [sic]

Conclusions: I conducted this concern investigation on the morning of April 14, 2026. The CP was complaining about sediments/ particulates in the drinking water. During the investigation, no sediments/particulates were observed in the water sampled. No discoloration or odors were observed either. I checked for sediments/particulates in the back of the toilet box and did observe a thin layer (not sand). The CP wondered if water hardness could be the issue. I conducted the following at a residence on the property that is owned by the CP (18465 CR 405):

Hardness (bathroom sink) - 16 mg/L
(1) bacteriological sample (bathroom sink) - SAFE
No further action required. The department contacted the water district and recommended that CR 405 be routinely flushed since it's a long line with only a few customers.

Concern No.	Received Date	Investigation Date	Suspected Source Owner/Operator	Concern Type(s)	City/County	Region	Inspector Initials	Final Action
65886	04/17/2026	04/21/2026	Montevallo Quarry	Fugitive Particulate Matter Work in Navigable Waters	Milo /Vernon	SWRO	BS	Site Visit

Concerned Party: Shelly Edwards

Concern Info: Good afternoon. My name is Michelle Edwards. My husband and I bought a house and property of of S E Hwy in Vernon County. Our address is 22948 S E Hwy (the old pre 911 address was 22948 E E Hwy, Milo, MO 64767. When we bought the house almost 9 yrs ago, we were told that the quarry that sits behind/beside the property had been shut down. All was good for the first 5 yrs. 2 yrs ago, we had dozens of dump trucks running in and out of the quarry from daylight to sundown, every day. We tried to contact the county, but got no help. We tried to contact DOT...nothing. We contacted the local sheriff's office...nothing. That went on all summer. They finally stopped at the end of the summer. That year, the quarry was sold. Last summer they hauled equipment out of it. Fast forward to these past few weeks, we've had one or two dump trucks running in and out of it again. Today, I've counted 5 or 6 different dump trucks. They are back to running all day. These are loud, heavy dump trucks.They aren't using covers on their loads. How can I find out if they are running illegally?

They are ruining E Hwy, which just got resurfaced. They drive in the middle of the road. I know of 2 people that have been run off of the road by them. They are stirring up dust like crazy. They are stressing my animals. We have a 30 yr old rescue horse plus ducks, chickens, a turkey, cats and dogs. The dust in my house is ridiculous now. The filters in my HVAC system have to be changed every other day.

We also have a deep well that supplies our household water. I'm worried that they will contaminate our water source. We're pretty sure they used explosives back there last week. This concerns me greatly.

Please help us, because no one else seems to care.

Thank you,
Michelle Edwards [sic]

Conclusions: CON-2446

I did not observe any air pollution violations during this investigation. No action is required. Grace Mobley from Land Reclamation reached out to the concerned party in regard to our findings.

Concern No.	Received Date	Investigation Date	Suspected Source Owner/Operator	Concern Type(s)	City/County	Region	Inspector Initials	Final Action
65887	04/16/2026	04/22/2026	John Pettibon	Open Burning	Richards /Vernon	SWRO	GE	Communication In Person

Concerned Party: Anonymous

Concern Info: Letter received from concerned residents of the City of Richards, MO. Squatter who is living full-time in a bus and is burning tires and other things on the property. [sic]

Conclusions: CON-2438
Pettibon signed the Solid Waste and Air Pollution Violation Acknowledgement letter.

Concern No.	Received Date	Investigation Date	Suspected Source Owner/Operator	Concern Type(s)	City/County	Region	Inspector Initials	Final Action
65888	04/16/2026	04/21/2026	old Montevallo Quarry	Land Disturbance Fugitive Particulate Matter	Milo /Vernon	SWRO	KC	Communication In Person

Concerned Party: Michelle Edwards

Concern Info: Good afternoon. My name is Michelle Edwards. My husband and I bought a house and property of of S E Hwy in Vernon County. Our address is 22948 S E Hwy (the old pre 911 address was 22948 E E Hwy, Milo, MO 64767. When we bought the house almost 9 yrs ago, we were told that the quarry that sits behind/beside the property had been shut down. All was good for the first 5 yrs. 2 yrs ago, we had dozens of dump trucks running in and out of the quarry from daylight to sundown, every day. We tried to contact the county, but got no help. We tried to contact DOT...nothing. We contacted the local sheriff's office...nothing. That went on all summer. They finally stopped at the end of the summer. That year, the quarry was sold. Last summer they hauled equipment out of it. Fast forward to these past few weeks, we've had one or two dump trucks running in and out of it again. Today, I've counted 5 or 6 different dump trucks. They are back to running all day. These are loud, heavy dump trucks. They aren't using covers on their loads. How can I find out if they are running illegally?
They are ruining E Hwy, which just got resurfaced. They drive in the middle of the road. I know of 2 people that have been run off of the road by them. They are stirring up dust like crazy. They are stressing my animals. We have a 30 yr old rescue horse plus ducks, chickens, a turkey, cats and dogs. The dust in my house is ridiculous now. The filters in my HVAC system have to be changed every other day.
We also have a deep well that supplies our household water. I'm worried that they will contaminate our water source. We're pretty sure they used explosives back there last week. This concerns me greatly. Please help us, because no one else seems to care. [sic]

Conclusions: CON-2448

No violations of the Missouri Clean Water Law were observed. No further action taken. Grace Mobley from land reclamation said that they would send an email to Michelle Edwards detailing the results of the investigation and that they would copy everyone involved. Mobley let Edwards know via email on April 22, 2026, that while on site it was clear that there was no evidence of mining since the land was sold two years ago. Mobley also mentioned that as suspected, there is a large pile of waste rock that is being removed from the land currently. Mobley told Edwards that there was a single excavator and haul truck present when we arrived and that Mobley confirmed with the landowner that they are just working to remove the pile of rock that was left by Ash Grove Aggregates when this was an active quarry.

Concern No.	Received Date	Investigation Date	Suspected Source Owner/Operator	Concern Type(s)	City/County	Region	Inspector Initials	Final Action
65908	04/20/2026	04/22/2026	Dishman Fertilizer	Odor Particulates	Helena /Andrew	KCRO	JS	Other

Concerned Party: Anonymous

Concern Info: From Webform email - New Report an Environmental Concern 78406 - Submitted at 1:32 pm Monday, April 20, 2026. Date of Incident or Date First Noticed 04/01/2026.

Strong smell coming from Dishman Fertilizer for multiple days [sic]

Conclusions: No violations of the odor regulation were observed. The site also appeared to be in compliance with risk management requirements.

Concern No.	Received Date	Investigation Date	Suspected Source Owner/Operator	Concern Type(s)	City/County	Region	Inspector Initials	Final Action
65911	04/20/2026	04/21/2026	Odessa Special Road District	Fugitive Particulate Matter	Odessa /Lafayette	KCRO	MC	Email

Concerned Party: Kevin and Holly Edson

Concern Info: From email forwarded to KCRO inbox from APCP Receptionist - Mon 4/20/2026 2:41 PM

From: Holly Edson hollyparker091@gmail.com
Sent: Monday, April 20, 2026 1:33 PM
To: APCP Receptionist apcp.receptionist@dnr.mo.gov
Subject: Treatment of gravel roads

To whom it may concern. My husband and I bought our house @ 4534 Curtis Rd, Odessa, MO 64076 late last year and unfortunately we're on the corner. We have a lot of dust with the gravel roads and wanting to know if they are going to be treated for the dust control? As we are new to the area as well to the gravel roads. If our email has been sent to worng place please let me know
Thank you
Mr. & Mrs. Kevin Edson [sic]

Conclusions: Missouri has no requirements regarding fugitive dust from unpaved gravel roads.

The Air Program receptionist also forwarded the message to the Lafayette County Clerk, who provided contact information for the Odessa Special Road District.

Concern No.	Received Date	Investigation Date	Suspected Source Owner/Operator	Concern Type(s)	City/County	Region	Inspector Initials	Final Action
65915	04/20/2026	04/21/2026	AFB International	Odor	Aurora /Lawrence	SWRO	JW	Phone Conversation

Concerned Party: Anonymous

Concern Info: Rcvd from EPA: "Every night and weekend, AFB in Aurora lets out the worst smell in the world. We can't even open our windows in town depending on how the wind is blowing. I work at Symrise in Verona Mo and we had to install a RTO to not get fined by the EPA. I've heard workers from AFB say they wait till specific times to run gross stuff and then I also heard they don't care to pay the fine they get at times because they make enough moneys running the stinking stuff to cover it. Can you not step up the fines: It's awful being a resident of this town."
FRS ID: 110000444591 [sic]

Conclusions: CON-2482
I did not observe any violations during this investigation. No action is required.

65916	04/21/2026	04/21/2026	Odessa Special Road District	Particulates	Odessa /Lafayette	KCRO	MC	Email

Concerned Party: Holly Edson

Concern Info: From Webform email - New Inquiry/ Question 78431- Submitted at 8:57 am Tuesday, April 21, 2026.

I've reached out to a couple of people with concerns about the high dust from the gravel roads. We bought our house late last year @ 4534 Curtis Rd Odessa Mo. We are close to the road and we have the corner lot. Unfortunately we don't know where to begin to get answers to get help with this.. It seems to be the main road to town the air quality is unbearable for us to even set out and enjoy our property or my husband to mow. Just need to know where we can turn to get answers and if we're responsible for the cost? Cause we're on a fixed income. Thank you in advance. [sic]

Conclusions: Concerned party had also reached out to the Air Pollution Control Program the previous day and was provided contact information for the Odessa Special Road District. Dust from unpaved public roads is not regulated by the department, so no further investigation was conducted.

65929	04/22/2026	04/28/2026	George Kroesen	Open Burning	Buckner /Jackson	KCRO	CK	Phone Conversation

Concerned Party: Brandon Borgman

Concern Info: This call to DNR was referred by Kouri Hunter an Independence Code Inspector.
Concerned Party (CP) reports that this location has been a constant source of open burning issues. Many times there is black smoke and strong odors when they burn and will burn at dusk to hide the black smoke. Two years ago, there was a fire at this property where fire got out of control and a fire had to be put out. The last time the Fort Osage Fire Department responded was on December 27, 2025, and also put out a fire on the property. So there should be a report for this response.
CP also states that there is a lot of waste and trash in the yard. Also reports that this may be a rental property or may be going into foreclosure as they believe that it is owned by someone that has passed away. [sic]

Conclusions: At the time of the investigation, no open burning violations could be observed. The responsible party states that he does not burn any prohibited items and does not bring items onto the property from other places. A compliance assistance letter will be sent by US Mail to this address.

65930	04/23/2026	04/23/2026	Missouri Organic Recycling	Odor	Liberty /Clay	KCRO	CK	Other

Concerned Party: Anonymous

Concern Info: From Webform email - New Report an Environmental Concern 78526 - Submitted at 7:50 pm Wednesday, April 22, 2026. Date of Incident or Date First Noticed 04/21/2026.

The Missouri Organic Recycling Center located at the above listed address emits a very strong foul odor that causes neighboring homes to be overwhelmed with the bad smell. [sic]

Conclusions: The department had been made aware of the odor issue on April 15, 2026, and the concern was investigated April 17, 2026. The facility was found in violation of Missouri's odor regulation. The facility has been working to address the situation. A compliance plan will be required to return to compliance.

Concern No.	Received Date	Investigation Date	Suspected Source Owner/Operator	Concern Type(s)	City/County	Region	Inspector Initials	Final Action
65931	04/21/2026	04/23/2026	Ideker - Mosby North Quarry	Fugitive Particulate Matter	Mosby /Clay	KCRO	CK	Phone Conversation

Concerned Party: Charla Lee

Concern Info: Dust is a constant issue from the Mosby Quarry. Dust leaves the property from blasting, vehicular traffic, and crushing operations. Blasting typically happens around 3:45 p.m., sometimes around noon, and sometimes in the morning. [sic]

Conclusions: No dust could be found leaving the property boundaries of Mosby Quarry. The lease of the farm property to the north where Ideker is doing underground mining provides a large distance from the dust being created at the crushing plant.

Concern No.	Received Date	Investigation Date	Suspected Source Owner/Operator	Concern Type(s)	City/County	Region	Inspector Initials	Final Action
65933	04/23/2026	04/28/2026	Chemical Odor	Odor	/Buchanan	KCRO	JS	Phone Conversation

Concerned Party: Timothy Gernon

Concern Info: From Webform Email. New Report an Environmental Concern 78521. Submitted at 5:27 pm Wednesday, April 22, 2026.

There is a super strong chemical almost vinegar odor in the air that is persistent. It is providing or causing headaches and it's not subsiding [sic]

Conclusions: The odor source could not be determined, and the odor did not appear to be present during the investigation. The concerned party will contact the department if the odor returns.

Concern No.	Received Date	Investigation Date	Suspected Source Owner/Operator	Concern Type(s)	City/County	Region	Inspector Initials	Final Action
65935	04/23/2026	04/23/2026	Carl Ehrlich, CE Grain	Odor	Farber /	NERO	DB	Report RNOV

Concerned Party: Rachel Elizabeth Caron

Concern Info: "Locals call the place the "Chicken decomp dump". Local chicken farmers and lord knows who else dump the unused chicken parts(beaks, feet, etc) as well as whole chickens into the ground to decompose. The smell is truely horrific, worse than a pig farm. Also concerning if the matter is going into the water table. Please help."
Note: previous RNOV [sic]

Conclusions: Found violation of the odor rule. Weather 63F, overcast, winds 12-19 mph SSW, 77% humidity. Using Google Maps I estimated the lot used for composting is about 5 acres. 11:00 AM, three odor readings using a Nasal Ranger found 6:1, 7:1, 7:1. Left site out of odor area to creek downhill of site, returned 11:24 three readings 15:1, 7:1, 7:1. At 11:26 two readings by Brent Mitchell (inspector trainee) 7:1, 7:1. On site, observed uncovered chicken and hog carcasses, significant standing water, maggots in water at south end of property. Odor type was decomposition and barnyard, and while on site found occasional strong ammonia odor. Water concerns investigated under separate concern form. Carl Ehrlich stated by phone the materials at the site include chicken and hog mortalities, hog and beef carcasses from a butcher shop, and cattle manure for cover.

Concern No.	Received Date	Investigation Date	Suspected Source Owner/Operator	Concern Type(s)	City/County	Region	Inspector Initials	Final Action
65937	04/21/2026	04/22/2026	Unknown/Jim Hawkins Jr?	Open Burning	Eagle Rock /Barry	SWRO	BS	Site Visit

Concerned Party: Anonymous

Concern Info: I believe that one or more parties are illegally open burning near SH 86 and FR 2275, in Eagle Rock, MO, in violation of 10 CSR 10-6.045(3)(A). While the episodes of burning might be somewhat sporadic in terms of frequency, they have consistently occurred in the mentioned area for approximately the past two years, and possibly longer. [sic]

Conclusions: CON-2489
No violations of 10 CSR 10-6.045 Open Burning Requirements were observed during the site investigation. No further action is required. A concern place closer to the burn date would be helpful for investigation purposes.

Concern No.	Received Date	Investigation Date	Suspected Source Owner/Operator	Concern Type(s)	City/County	Region	Inspector Initials	Final Action
65938	04/21/2026	04/29/2026	Bobbie"unknown last name"	Hazardous Air Pollutant Release Fugitive Particulate Matter Pesticides or Herbicides	Springfield /Greene	SWRO	WH	Referred to Other Agency

Concerned Party: Anonymous

Concern Info: Anonymous caller stated that her neighbor "Bobbie" unknown last name is spraying pesticides and are drifting into her back yard. She has asthma and it affects her greatly, burning eyes, throat etc. Last year she ended up in the ER due to this. It also affects her dogs when they are outside. Gus Johnson owns the property and his phone number is 417-840-6879. She would like someone to come out and investigate. [sic]

Conclusions: CON-2494

Information will be forwarded to Missouri Department of Agriculture.

Concern No.	Received Date	Investigation Date	Suspected Source Owner/Operator	Concern Type(s)	City/County	Region	Inspector Initials	Final Action
65941	04/22/2026	05/01/2026	IsoNova Technologies	Odor	Verona /Lawrence	SWRO	JW	Site Visit

Concerned Party: Anonymous

Concern Info: Caller states that the IsoNova Technologies lagoon is releasing foul odor. The caller is aware of the agricultural exemption of sludge spreading on farm surrounding the IsoNova facility, but he insists that most of the odor is coming from the lagoon. The caller explained that the smell coming from the lagoon is noticeably different than that of the sludge on the fields. [sic]

Conclusions: CON-2515
I did not observe any violations during this investigation. No action is required.

Concern No.	Received Date	Investigation Date	Suspected Source Owner/Operator	Concern Type(s)	City/County	Region	Inspector Initials	Final Action
65942	04/22/2026	04/28/2026	Larry Wald	Odor	Carterville /Jasper	SWRO	JW	Phone Conversation

Concerned Party: Anonymous

Concern Info: CP complains of alleged excessive odors from C&L Grease & Wastewater Services. CP claims that odors went away for a while but have recently gotten worse. CP alleges that people in the community are afraid to call and file complaints in fear of retaliation from C&L, local politicians/ police officers, and the department. [sic]

Conclusions: CON-2524
I did not observe any violations during this investigation. No action is required.

Concern No.	Received Date	Investigation Date	Suspected Source Owner/Operator	Concern Type(s)	City/County	Region	Inspector Initials	Final Action
65944	04/23/2026	04/28/2026	Jeff Davis	Asbestos Open Dumps: Construction and Demolition	Buffalo /Dallas	SWRO	JW	Phone Conversation RTC, UF

Concerned Party: Todd Murray

Concern Info: JD's Trash Business is hauling commercial waste and asbestos shingles and dumping onto a property. Caller states several have dumped materials on this site. Material is coming from demolition projects in the City of Buffalo. [sic]

Conclusions: CON-2531
During the investigation I found evidence that commercial structure was demolished without an asbestos inspection nor notification to the department. An Unsatisfactory Findings letter with No Response Required was sent to the contractor on May 11, 2026 to cite failure to inspect and notify. No response was required since the building was completely demolished and most if not all of the demolition waste was clean fill.

Concern No.	Received Date	Investigation Date	Suspected Source Owner/Operator	Concern Type(s)	City/County	Region	Inspector Initials	Final Action
65945	04/23/2026	04/28/2026	Larry Wald	Odor	Carterville /Jasper	SWRO	JW	Phone Conversation

Concerned Party: Anonymous

Concern Info: Anonymous concerned party reported odors coming from C&L Grease. Wind was reportedly from the south and odors could be smelled in downtown Carterville. Odors were described as "terrible" and "sickening". Odors reportedly came from the area south of C&L Grease's location on 5th St. where they "dump whatever they dump" as stated by the concerned party. The concern interview was nearly identical to Concern number CON-2524.

Concerned party said DNR gave C&L a warning several months ago, and the odors stopped for months. Now it is smelling bad everyday. "Citizens were elated when there were no odors". Concerned party, "wants it back to the way it was" with no odors.

As stated in CON-2524, citizens are reportedly afraid to report the odors because the Wald family is "connected" with City Council and Chief of Police. [sic]

Conclusions: CON-2532
I did not observe any violations during this investigation. No action is required.

Concern Info: Report states "The plant is not properly tracking or recording emissions of Volatile Organic Compounds and Hazardous Air Pollutants, as required under the terms and conditions of their Title V permit" [sic]

Conclusions: I called the facility and discussed the concern with Abe Conklin. He provided the VOC and HAP records by email. I found no issues of concern. A complete compliance evaluation will be performed during the next routine inspection. Note, he informed me the facility recently changed from 3 shifts to 1, so there have been many people upset at the lost work.

Concerned Party: Anonymous

Concern Info: From Webform Email. New Report an Environmental Concern 78701. Submitted at 8:32 pm Saturday, April 25, 2026.Date of Incident or Date First Noticed 04/24/2026.

At 505 North Main St in Centerview, MO has been repeatedly burning stuff that stinks up the air for as long as I can remember! I have called the Sheriff’s Dept & the Fire Department & it never stops! I can’t open my windows during these times because my eyes burn. Today it was billowing solid black smoke & smelled like plastic. [sic]

Conclusions: The Sheriff's Office and Fire Department had no records of any open burning calls at this property. I did not observe evidence of current open burning activity when looking at the burn barrels and old burn pile. The homeowner, Jannie Nelson, denied burning any prohibited items and will be sent a compliance assistance letter with copies of the open burning regulations.

65974	04/13/2026	04/16/2026		Open Burning	Barnhart /Jefferson	SLRO	LZ	

Concerned Party: Anonymous

Concern Info: CP stated that the SoC is burning waste that is in black trash bags. CP doesn't not believe that it is residential waste. He said that he believes that it could be some sort of plastic/rubber because of the smell. He stated that this is the 3rd day in a row that they SoC has been burning, and that the SoC has 7-8 trash bags ready to burn later today. He also doesn't believe that whatever they are burning isn't coming from the residence and is being brought in from somewhere else. He has already talked to the fire department. CP gave two properties that both are burning and they are related to each other.

3135 Upper Moss Hollow, Barnhart, MO 63012
2982 Upper Moss Hollow, Barnhart, MO 63012

CP stated that there is an open drug investigation (meth) regarding the people living at these properties I let him know that if an investigator goes out the site and deems it as a meth lab, the concern will be referred to someone else

A water concern was also placed regarding the property at 3135 Upper Moss Hollow Rd. [sic]

Conclusions: An investigation was conducted and no violations were noted at the time of the investigation.

Concern Info: From email received in KCRO inbox - Bad Odor At Missouri Organic Liberty - Mon 5:40 PM

Good afternoon, I am sending this to complain about Missouri Organic at Liberty. The odor that eminates from their property is overwhelming and is a health issue. There are days that you can not go outside due to the terrible smell. We are directly north of the property less than 1/2 mile and the smell is horrible and we should not have to put up with it. I know they have been cited multiple times and we are rural but this goes beyond just a slight odor and something needs to be done to get it cleaned up. The smell is so bad at times there are complaints in the city of Liberty 5 miles away. If someone could let me know what is going to be done so that we can enjoy our farm again I would appreciate it.
Thank you, [sic]

Conclusions: The department had been made aware of the odor issue on April 15, 2026, and the concern was investigated April 17, 2026. The facility was found in violation of Missouri's odor regulation. The facility has been working to address the situation. A compliance plan will be required to return to compliance.

Concerned Party: Kathy Merrims

Concern Info: CP states: Neighbor constantly burns lots of plastic, he even had a pbc pipe and oil out there burning a few days ago. The burning is causing medical issues for me. He burnt at least 50 pieces of lumber one day. He has no utilities or sewage system in place.
Please help or send to someone who can. [sic]

Conclusions: On April 24, 2026, I began the investigation of the concern by verifying the incorporated community had an established utility system. I reached out to the the City Hall of Iron Mountain Lake and left a voicemail about the concern in question. The automated message stated a telephone number for emergency sewer issues so I called and reached Cory Acres. I informed Cory Acres about the concern and location. He stated he was heading over there now to investigate and asked about follow up. I stated it was left to the community. If there was sewage being put on the ground the owner would need an approved system and the area would need to be limed.

Concern Info: From email received in KCRO inbox - Missouri Organic Liberty horrible odor - Mon 6:03 PM

Good evening, I live near the Missouri Organic Liberty recycling food business. I am writing this to complain about the horrible odor that we have to put up with because the smell is so bad we dont even want to be outside with the stink. The odor also cant be very healthy and has been going on for years even though they keep getting violations and cited for it. We are fed up with this odor and would like something to finally be done to them to either get rid of the odor or shut them down. I ask, would you like to live next to rotting fermenting old food?? [sic]

Conclusions: The department had been made aware of the odor issue on April 15, 2026, and the concern was investigated April 17, 2026. The facility was found in violation of Missouri's odor regulation. The facility has been working to address the situation. A compliance plan will be required to return to compliance.

Concern Info: From email received in KCRO inbox - Dangerous odor - Mon 6:15 PM

Good Day, I have been putting up with a disgusting smell coming fom the Liberty Missouri Organic operation. I have lived here all my life and am really getting tired of the stench. I can not even sit on my porch and enjoy a nice quite evening without this smell. Its time that something gets done! I do not want to pass this property down just to have them have to put up with this. Please get someone out to cite them or shut them down because this has gone on for to long. I know they are a big company but this is bad for my health and I want something to be done! I am tired of smelling this because I can not even have someone out to just be outside snd work in my garden [sic]

Conclusions: The department had been made aware of the odor issue on April 15, 2026, and the concern was investigated April 17, 2026. The facility was found in violation of Missouri's odor regulation. The facility has been working to address the situation. A compliance plan will be required to return to compliance.

Concern Info: Over the weekend they burned three trailers by pushing them together, including, and are planning to burn a fourth trailer. [sic]

Conclusions: CON-2589
During the investigation I observed evidence of demolition of multiple mobile homes on the same property, illegal open burning, and illegal disposal of solid wastes. A Letter of Warning was issued to the property owner on May 20, 2026 requiring clean-up of the burn pile and proof of proper disposal. A Compliance Schedule was attached to the letter, which gives the property owner a due date of July 15, 2026, to resolve the required actions.

66005	04/27/2026	04/28/2026	Jim Staats	Open Burning	Lawson /Clinton	KCRO	JS	Phone Conversation RTC, UF

Concerned Party: Lori Drexler

Concern Info: Concerned Party (CP) stated the neighbor south of her is burning CCA lumber near the barn on the property line and blowing the smoke into the CP's horse barn to where CP cannot use it for fear of safety for her horses. Neighbor/ property owner is Jim Stots or Stats. CP stated his significant other also helps with the burning and her name is Jeanie Knack. They have been burning on and off for a few weeks and wearing masks while doing so-showing they know the smoke is toxic.

CP stated Jim has poisoned all the cats in the area and threatened to also poison any other animal that enters his land, specifically her animals. CP was headed to the police department for the threats and to stop the burning. CP stated there was potential that the police would not help as they are friends with Jim. CP stated that Jim would be argumentative but not necessarily physically violent and is an estimated 80 year old man while Jeanie is estimated to be 70.

CP provided her address for the concern but when I attempted to verify the location, google did not pin the correct property but it got close. CP's property is north of ABS Technologies off 69, Jim owns ABS Technologies and his property is adjacent per a Google Aerial. Both properties are located on the western side of Highway 69. Google also shows that CP and Jim's barns are located near each other. [sic]

Conclusions: A Report of Unsatisfactory Findings is being issued to Jim Staats for open burning of demolition debris consisting of untreated wood waste less than 200 yards from a structure not owned by him.

Concerned Party: Anonymous

Concern Info: Concerned party stated that an individual is actively burning down a house in the town. Stated the fire department and city would not be involved unless the department required them to do something. Also concerned that they are bulldozing everything into the fire and worried about asbestos. [sic]

Conclusions: CON-2603
During the investigation I observed evidence of illegal open burning of demolition waste. An Unsatisfactory Findings with No Response Required was sent to the contractor (and the owner was CC'd) on May 20, 2026. No response was required because the contractor cleaned up the demolition waste and provided proof of proper disposal within a week after the investigation. No asbestos citations were issued because the demolition met the conditions of the NESHAP Subpart M residential exemption.

Concerned Party: Lorie Drexler

Concern Info: This property originally was a business for the last 10 years. Then it was rezoned by the owner to residential in order to build a home. The residence is currently under construction. CP reports that construction waste is being burned practically next to the north fence line and all the smoke is going over to her property where they have horses and she is concerned that it is affecting the animal's health negatively. CP reports that owner and girlfriend are not yet living there on site yet because house is not finished. States that the girlfriend, Jeanie Knack has been adding items to burn pile to keep the fire going.
CP reports that she has spoken to Clinton County Planning and Zoning Office and spoke to Tricia "P.J." Knight-Administrator. CP states that she was told that Stott could burn anything that he wanted to burn on his property. (Tricia "P.J." Knight the Clinton County Administrator for Planning and Zoning on February 11, 2026, was sent copies of the Open Burning Requirements and specifically, "Managing Construction and Demolition Waste".) This office may need some follow up compliance assistance to ensure that correct regulatory information is being provided to residents. [sic]

Conclusions: Concerned party had also contacted the department 04/27/2026. Concern was investigated 04/28/2026, and a Report of Unsatisfactory Findings is being issued to Jim Staats for open burning of demolition debris consisting of untreated wood waste less than 200 yards from a structure not owned by him.

Concerned Party: Jeffrey Schneider

Concern Info: From web concern: "On behalf of the Meadows at Hidden Springs HOA, I am submitting a formal complaint regarding the mulch composting operation located on Dogwood Tree Road in Stone County, Missouri.

This is not an isolated or occasional concern. Residents in our community are experiencing persistent and significant off-site odor impacts originating from this operation. The odor is strong, frequent, and travels well beyond the property boundaries, affecting multiple homes and outdoor spaces.

This raises several concerns that we believe warrant immediate review:

Whether the facility is operating in compliance with Missouri Department of Natural Resources regulations related to composting operations
Whether proper material handling, storage, and processing practices are being followed
Whether runoff, leachate, or other byproducts are being properly managed
Whether the operation is creating conditions that could impact air quality or surrounding property use

This is not simply a matter of inconvenience. The intensity and consistency of the odor suggest that there may be operational or environmental control issues that extend beyond what would be considered normal for this type of activity.

Additionally, this operation is located in close proximity to residential properties. The continued off-site impact is affecting the ability of homeowners to use and enjoy their property.

We are requesting:

A formal site inspection by DNR
A determination of whether the facility is operating in compliance with all applicable environmental regulations
Guidance on what corrective actions may be required if deficiencies are identified

Residents are prepared to document dates, times, and severity of impacts as needed to assist in this review.

We appreciate your attention to this matter and request confirmation that this complaint has been received and is being evaluated.

Sincerely,

Jeffery Schneider" [sic]

Concerned Party: Mary Francis

Concern Info: Concern called into EPA on 04/23/2026 and forwarded to MoDNR on 04/29/2026:

- Approximately 2-3 days ago the farmer dumped 5 large piles of chicken manure full of bones at the farm (near the silos). Each pile is approximately a dump trailer high. The farmer has also put 2 piles at 258th and Groh Rd.
- There is a pond near the farm.
- Informant's primary concern is air-bourne health effects. Approximately 3 years ago the famer used similar manure with bones. The manure was not composted or cured, just mixed into the soil without the processing needed to get rid of bugs/bad health effects. During this time, members of the informant family has some serious health problems and their doctor indicated that the improperly composted materials could be a source.
- During the past instance the informant contacted MoDNR, but when MoDNR came to check it out they saw no bones in the manure and didn't investigate further. This time the informant has pictures showing the bones, which are available upon request.
- Informant is also concerned about a neighbor who has cancer.
- Informant is concerned for the health of the residents near the farm and expressed that it would be helpful if at a minimum the piles were kept well away from any neighbors. This is not an odor concern, but concern that the air they are breathing is not safe and for what is being put into the soil. [sic]

Conclusions: There are no water quality violations or concerns at this time. The chicken litter is coming from a permitted farm in south western Missouri. I provided a department publication regarding best management practices and requirements for temporary stockpiles of poultry and other dry process waste to the responsible party. The Department of Agriculture confirmed that bones are OK to be in the chicken litter stockpiles. Additionally, because this is an agriculture use practice, the activities are exempt from odor regulations.

Concern No.	Received Date	Investigation Date	Suspected Source Owner/Operator	Concern Type(s)	City/County	Region	Inspector Initials	Final Action

Concerned Party: Anonymous

Concern Info: CP first noticed that the source of concern had torn down a barn on Tuesday and started burning today around 10am. Cp says that they created a big pit and have been using a bulldozer to push the debris over to burn it. Cp called local sheriff who sent them to the fire department. Fire department has been to the site twice. Fire department said there was nothing that they could do because the debris is in in the pit and does not seem at risk of spreading. The burning debris is causing large amounts of black smoke. Cp is worried that they plan on adding more debris from the property like tires that are on the property or the barn shingles which are not in the pit yet. [sic]

Conclusions: A Report of Unsatisfactory Findings is being issued to Michael and Kayla Clark for open burning of untreated wood demolition debris less than 200 yards from a structure not owned by them.

Concern Info: Received via EPA email concern:

He is running a so called composting site. Mixed into the C&L grease trucks and unmarked food product trucks coming in has been reported that C&L sanitation which is a company that pumps out septic tanks is also dumping occasionally. Human waste is highly illegal to dump into compost piles. Please also check the streams because of the run off. I have heard a neighbor saw tampons in the stream coming off that property. He has had at least two air violations with DNR. Two people in our area have gotten lung infections from breathing in this. He always trucks in massive amounts on Friday and Saturday because he knows DNR isn't working. He has also been setting fire to piles on Saturday nights. Please help us! This is a health risk for not only humans but the wildlife in our area. [sic]

Conclusions: CON-2659
I did not observe any violations during this investigation. No action is required.

66059	04/29/2026	05/01/2026	Emery Sapp & Sons Construction	Open Burning	Independence /Jackson	KCRO	CK	Phone Conversation

Concerned Party: Eric Wilson

Concern Info: From phone call received by EPA on 04/24/2026 and forwarded to MoDNR on 04/29/2026:

- Burning started about a week ago and is producing a lot of smoke. The ash from the follow-out is also encrusting vehicles. It is difficult to breath when outside.
- The fire department told the informant that it is a permitted burn that is scheduled to occur for another 3-4 weeks. Informant is concerned that they are allowing a large, long duration burn to occur in a populated area. [sic]

Conclusions: At the time of the investigation, the commercial land clearing of timber and vegetative waste from a housing development property appeared to be in compliance with the open burning regulations when using an air curtain incinerator.

Concern Info: New Report an Environmental Concern 78996. Submitted at 10:37 pm Thursday, April 30, 2026. Date of Incident or Date First Noticed
04/29/2026.

On 04/29/2026 me and several neighbors (literally the entire neighborhood) noticed a terrible smell. These people moved to the abandoned house (address listed) in a camper overnight a little over a month ago. The address has no sewage or trash service or any utilities at all, so they've been dumping their sewage on the ground. We called the police and even the police acknowledged the smell and the common sense that they're dumping their sewage out. This is an emergency, we have kids at our house and the neighbors have kids at their house. The entire neighborhood is smelling and suffering through this and for the past 2 days the police have submitted reports to city code enforcement who have not acted on this. So me and my entire neighborhood are begging for something to be done. This is not okay for all of us to have to put our health at risk. [sic]

Conclusions: The environmental concern was referred to Jackson County Health Department and City of Independence.

66089	04/22/2026	04/22/2026	CE Grain / Carl Elrich	Odor	Farber /Audrain	NERO	DB	Report RNOV

Concerned Party: Paul Evans

Concern Info: Caller reports that the CE Grain facility east of Farber has an incredibly strong offensive odor consistent with decomposing livestock mortalities. Caller also stated that this odor issue has been ongoing for years and the odor is so bad it can be smelled from miles away from the facility. [sic]

Conclusions: Issuing RNOV for odors. Previous penalties. Water pollution RNOV issued jointly for related concern. Found violation of the odor rule. Weather 63F, overcast, winds 12-19 mph SSW, 77% humidity. Using Google Maps I estimated the lot used for composting is about 5 acres. 11:00 AM, three odor readings using a Nasal Ranger found 6:1, 7:1, 7:1. Left site out of odor area to creek downhill of site, returned 11:24 three readings 15:1, 7:1, 7:1. At 11:26 two readings by Brent Mitchell (inspector trainee) 7:1, 7:1. On site, observed uncovered chicken and hog carcasses, significant standing water, maggots in water at south end of property. Odor type was decomposition and barnyard, and while on site found occasional strong ammonia odor. Water concerns investigated under separate concern form. Carl Ehrlich stated by phone the materials at the site include chicken and hog mortalities, hog and beef carcasses from a butcher shop, and cattle manure for cover.

Concern Info: From Webform email - New Report an Environmental Concern 79201 - Submitted at 7:53 am Tuesday, May 5, 2026. Date of Incident or Date First Noticed 05/03/2026.

I am a local contractor that was contacted by someone that was trying to demolish a home near downtown Kansas City.

I went and looked at the project and told her they needed to be in an environmental assessment on the property for lead paint and asbestos before getting the permit to tear the house down Demolished and have the debris hauled away. She argued with me that I was wrong and that I was trying to “rip her off “with these claims. So she went around me and hired some individual to tear the house down in the middle of the night. I don’t know who this person is, but he pushed the house down into the basement and then hold in dirt to bury the home. The property is a giant mound of dirt now with a 1900s era home buried under the dirt. This woman didn’t contacted me trying to get me involved to hide the evidence or to flatten out the land and spread the dirt around so that it wouldn’t be so noticeable. I declined this and contacted the EPA and filed a complaint. I’m filing a complaint with you guys here now on the same issue. I am fairly certain that she knew the house had a lot of lead pain and asbestos in the roofing material in the brick mortar and the plaster inside. I know that you cannot get a permit for Demolition if you don’t have an environmental inspection so I don’t know how this person got a permit to demolish the home. She claims that he was able to get a permit. ?? [sic]

Conclusions: Referred to City of Kansas City; 311 Work Order ID:3218124

Concern Info: From Webform email - New Report an Environmental Concern 79221 - Submitted at 10:01 am Tuesday, May 5, 2026. Date of Incident or Date First Noticed 09/01/2025.

1801 Main St. Greenwood, MO 64034
This is a property that has a house and a field in the middle of Greenwood. Many houses are adjacent to the property. Alec O'Connor owns the property. Since he purchased the property he has been digging giant plots of dirt up and creating large piles on dirt on the property. It is causing moles, mice, coyotes, etc. to be displaced and are coming into the neighboring properties. He has dug up so much a neighbors shed even started to cave in. The city of Greenwood has told him to return the land to it's natural state, but he has yet to comply. He also keeps his work equipment and trucks on the property (he owns a septic and excavation company) and we often smell the septic truck and are worried the digging may be related to illegal dumping of his septic trucks. We have no proof of this but we do not understand why his has dug up and gotten rid of so much dirt from his property. Many neighbors have complained to the city. [sic]

Conclusions: No further action required.

66127	05/04/2026		Unknown	Open Dumps: Construction and Demolition Asbestos	/Livingston	NERO	DP	Referred to Other Agency AC

Concerned Party: Anonymous

Concern Info: On May 4, 2026, the Northeast Regional Office received a concern stating that somebody dumped a load of 9"x9" asbestos floor tiles under the Thompson River Bridge. The caller states that they are on the east side of the bridge about 10 feet from the parking area. Caller states that the tiles are under the bridge. The caller states that the floor tiles are piled on a tarp. [sic]

Conclusions: On May 5, 2026, I, David Peek, investigated the concern. Driving over the bridge along Missouri Highway 190 West, I could not see any floor tiles. I turned onto the gravel access road and continued to the parking area. I noticed a large pile of shingles with minor amounts of other waste mixed in the waste mass.

I exited the vehicle and confirmed that there was a tarp underneath the shingles. The pile was about 12 feet wide and 12 feet long. To the southeast of the pile of shingles, there was treated lumber, mostly particle board, strewn about in a separate 10'x10' area.

The Department of Transportation was contacted on May 20, 2026, and requested to remove and properly dispose of the waste. Due to elevated water levels at the site, the DOT said that when the water subsides, the waste would be removed, if it had not migrated off site.

Concerned Party: Deborah Morganthaler

Concern Info: Caller states that the odor coming from Hansen's Tree Service is a "8/10, 10 being the worst ever" in strength. The caller states that this has been a recurring issue for a couple of years, but she did not know that the department can enforce odor issues until recently. The caller suspects that the strongest odors are released whenever the facility grinds compost material. [sic]

Conclusions: CON-2767
I did not observe any violations during this investigation. No action is required.

Concern Info: See concern #2625 for previous investigation findings (no odor violations). The concerned party called the department at 7:45am on May 7, 2026 to report that Hansen's Tree Service was releasing strong odors that drifted north into the "Meadows at Hidden Springs Lane" neighborhood. The caller states that she could smell the odor inside her vehicle as she was leaving for work in the morning. [sic]

Conclusions: CON-2760
I did not observe any violations during this investigation. No action is required.

66180	05/05/2026	05/06/2026	Moxba Innovations	Hazardous Waste Containers	Rolla /Phelps	SERO	JE	Letter

Concerned Party: Anonymous

Concern Info: CP states "Phelps Moxba, a chemical company that make fertilizer chemicals that are mixed in tanks that are partially in ground under a covered carport. All tanks are busted, have cracks, and leak into the ground. Staff go down in the bottom of tanks to silicone and caulk them. There is concern about ground water pressure. They are putting caustic bags in regular trash and there are open containers everywhere. They don't know what is in the containers because they are full of runoff from ends of batches where they are scraping where they cleaned a press. Totes have no lids and fill with rain and overflow. They have a lab to figure out what is in the containers. They are having to go into confined spaces and concerned about air quality monitoring due to ammonia. Chemicals are going right into the ground. Acid bags are going into the trash. They have 200 acres and are starting to expand more. Ammonia is strong on top of one tank and fears of worker conditions." [sic]

Conclusions: Upon receiving the concern, I contacted Brandon Backus, Hazardous Waste Program, to discuss the concern received. We discussed the concern of the tanks that are partially in ground being cracked. Brandon suggested that this would likely be an OSHA thing they would check in on. Brandon then stated this was discussed with the concerned party who referenced they would likely reach out to OSHA. We then discussed the remainder of the concern, including improper labeling and disposal. The department conducted a hazardous waste inspection at this location on January 13, 2026, which warranted a Notice of Violation being issued to Moxba Innovations, LLC on March 13, 2026.
Following the discussion with Brandon, I reached out to Scott Volner, Executive President of Moxba Innovations, LLC. We spoke of the concern and discussed the various items mentioned. When asked about the cracked tanks, he stated they have made repairs, but are looking at installing stainless steel containers sometime in the summer. The current plastic tanks would "sleeve" the stainless steel tanks. He did state that they are continuing to work towards the requirements in the Notice of Violation. I asked about potential expansions on the property; he stated that there have been talks, but nothing confirmed or truly planned yet. We discussed land disturbance requirements through the department, which Scott responded he is aware of and will submit the necessary documentation if they decide to expand.

Concerned Party: Timothy Heller

Concern Info: Concerned party states that they smell a strong "burning electrical smell" but are having trouble pinpointing the exact origin. This has been detected when the wind is blowing south to north. They are located near the intersection of Sawmill Road and Herzg Lane on the north side of Highway 32 near New Offenburg or Weingarten. [sic]

Conclusions: On April 21, 2026, I drove highway 32 in search of the odor. I started the investigation at Fliegs Equipment on Highway 32, I asked personnel general questions and gauged their awareness of the odor. No one at this site was aware of the odor. I continued to drive highway 32 with the windows down. Made observations at the on Herzog road and again at Duncan's Services. I did not notice any odors at anytime during the investigation. I continued to observe with the windows down until the St. Francois county line.

Concern Info: CP states: Neighbor constantly burns lots of plastic, he even had a pbc pipe and oil out there burning a few days ago. The burning is causing medical issues for me. He burnt at least 50 pieces of lumber one day. He has no utilities or sewage system in place.
Please help or send to someone who can. [sic]

Conclusions: Upon receiving the concern, I reached out to the concerned party. We discussed the concerns and when asked about the open burning, the concerned party stated that the burn pile had been cleaned up. We discussed what is allowable within open burning requirements and I stated that Iron Mountain Lake may have more stringent restrictions. I contacted the city hall and was referred to Mayor Goodman's email. I sent an email stating the concerns received for open burning and waste water. The waste water concern was also referred to the city via Cory Acres, Sewer Operator.

Concerned Party: Matthew Newman

Concern Info: Caller states that the smell today is really bad. The caller said that the smell was noticed from their home, at the facility, and a neighbor approximately 2 miles away. I asked the caller if they noted the wind direction and they said the wind was from the south. I also asked what time they noticed the smell and they replied first thing this morning.

The caller also said that there was a truck dropping off a tanker load of liquid from Arkansas. I asked if the truck had markings, and the caller said they were marked with Bubs Incorporated Oil Harvest. I also asked when the load was delivered, and the reply was within the last hour - approximately 1330 - 1430.

The caller also asked if I knew if the facility had a permit. I told the caller the investigator would be best able to answer the question. [sic]

Conclusions: CON-2783
I did not observe any violations during this investigation. No action is required.

Concerned Party: Lindsey Kamper

Concern Info: We received an environmental concern from the DNR website. The CP states: This week they called for severe storms and hail. They let out the children early from school. Everybody was concerned, dark clouds came over the outskirts of Washington, Mo where I was standing. It passed. The sirens were going off everybody was alarmed. The 29, our Missouri River front is flooded and on the day and night of the 29th the sky was Erie and the sun was not warm but very bright and strange shadow tint on the tree leaves. After hours of curious observation it occurred to me as I watched pink smears across our towns sky that this was the direct result of cloud seeding. Which is a 100,000 fine. They passed the Clear Skies Act and unfortunately do not know who did it or where but it was done. I will continue to report. [sic]

Conclusions: DNR does not regulate emissions from mobile source emissions.

Concern No.	Received Date	Investigation Date	Suspected Source Owner/Operator	Concern Type(s)	City/County	Region	Inspector Initials	Final Action
66200	04/06/2026	04/30/2026	Todd Moore	Other	Perryville /Perry	SERO	JW	Phone Conversation

Concerned Party: Perry County Commissioner Jay Wengart

Concern Info: Perry County Commissioner Jay Wengart advised he had received concerns from the public regarding the staging of large amounts of wood waste from apparent tree trimming operations. Concerns regarding the staging of the pile adjacent to a propane tank on a neighboring property of a church. Additional safety concerns for open burning have been noted. [sic]

Conclusions: On April 30, 2026, I attempted a phone call to the owner, John Glennon Moore, listed on the department's parcel viewer webpage via a phone number located on the internet (573-547-4063). I left a voicemail.
On May 1, 2026, I left a voicemail for Southern Landscape Services, Todd Moore (573-547-5510). This was based off historical department records (Notice of Violations issued on November 3, 2014) issued to both Todd and Glennon Moore, respective to the property. The Notice of Violations were issued due to open burning of wood waste brought to the property via the landscaping business. I left an additional voicemail for John Moore.
On May 5, 2026, I left a voicemail for both parties again. Todd returned my call and we discussed the concern received. We discussed the historical NOVs issued by the department. He advised that he is only bringing vegetative wood debris (no solid waste) back to this property and is not burning it. He stated the current amount is an accumulation over approximately 15 years.
The property owner is his dad, John “Glennon” Moore. He referenced plans for a wood chipper (1+year), but money is tight and efforts have been limited. I advised him that he should consider staging some distance between his wood waste and the propane tank on the church property, to which he agreed. I also encouraged to identify another piece of property (his own or a business partner) that would meet the open burning distance requirements to allow for disposal of the wood waste. He advised he would check into it.
I also advised him for his awareness my discussion with the County Commissioner would be to discuss with the local fire department, if there are any safety concerns from their side. I discussed that currently based off reports, that no regulatory concerns currently exist from the staging of the wood waste. However, should new information, safety concerns, or nuisance concerns arise, that this could impact consideration.
Todd stated his father is elderly, and referenced he had received a phone call. I advised Todd to forward on our discussion with his father or awareness, as he is the property owner. I also told Todd that a department team member would be visiting the property for photographs.
On May 6, 2026, Environmental Specialist Hayden Cassinger visited the respective site and took photos (see attachment). A large amount of vegetative wood waste was staged on the property with no signs of open burning. The debris on the property was immediately adjacent to a propane tank and other utilities (utility poles).
On May 7, 2026, I discussed the site with Todd Moore. I encouraged him that the vegetative wood waste should be staged back from the propane tank, any structures, and/or utilities for safety considerations and/or provide accessibility. He advised that he would create a distance between the wood waste and these locations. I advised him that a local fire district or utilities provider may have further requirements on the distance requirements, and that he may be contacted regarding this as I would be encouraging Commissioner Wengart to discuss his concerns with the local fire district.
Based off discussion and investigation, no open burning actions had occurred or are planned. It was recommended to identify a disposal route (open burning/wood chipping) for the wood waste, that meet regulations accordingly. Options could include identifying a separate property (or an agreement with another property owner) for a location that could meet open burning regulations. It was advised should continued concerns be received, the department will investigate accordingly based off the information provided and evaluate.
An email was sent advising recommendations and regulations (see attached). I contacted Commissioner Wengart for awareness of discussions. He advised plans to contact a local fire district for discussion and potential investigation of the staging of the wood debris.

Concerned Party: Dana Poese

Concern Info: Alleged violator burns trash, including plastic jugs, approximately once a week. This has been going on for a while, especially on the weekends. The informant notices it more in the summer, likely because the informant is outside more, but it occurs year-round. The alleged violator has moved the barrel out of the front yard, which helps, but the informant still regularly smells plastics being burning (even when the informant can't see the smoke). It's frustrating that the alleged violator burns the plastic, when there is a recycling center down the road.

The informant went to a county commission meeting, but the county indicated that since there are no ordinances there is nothing they can do to stop the burning. Those in attendance seemed more concerned about parked cars and other eyesores then this potential health concern, even though one can't help but breath in the fumes from this burning.

Though this neighborhood is technically rural, as it is outside of the city limits, it is set up like any other city neighborhood with houses near each other.

The informant can smell the fumes from down the street and sometimes from within the house. The informant is concerned that the fumes could be impacting people's health, especially the children that play in the area. The informant indicated that several of the neighbors have cancer and a few have died from it.

It is extremely stressful to unintendedly breath in these fumes and be told (by the county) that there is nothing that can be done. [sic]

Conclusions: Concerned party confirms that only household trash is being burned, which is not a violation of Missouri's open burning regulations.

Concerned Party: Bob Smith

Concern Info: CP states;
For several months neighbor has been burning chemicals and other unsafe items on ground behind his house. The smoke and odors are so strong he can no longer go outside most of the time. This issue has caused his breathing issues to worsen. He contacted Dunklin County Sheriff about this but believes nothing has been done. He suggested maybe we call the Sheriff's office to see if they would help resolve this. He just wants the burning to stop or the neighbor to move his burn area to another location so he does not have to deal with this situation. He is very frustrated. He has photos of the materials being burnt if needed for our investigation. [sic]

Conclusions: Upon conducting the investigation, a violation of Missouri's Open Burning Requirements was observed for burning of various durable goods and scrap tires. For full details on the investigation and findings, please refer to the Letter of Warning issued on May 14, 2026, to Ritchard Zolman.

Concern Info: Via Webform email - Submitted at 7:43 am Friday, May 15, 2026 -

Horrific odor coming from Missouri Organic AGAIN. I reported this once and you gave them a citation and a date of May 1 to have it corrected. It is now May 15, 7:30 am and I had to close my windows and turn on my air. We haven't had rain in 2 weeks, so it's NOT due to moisture. This is ongoing and is now going into the evening hours of 7:30-8:00 as well. [sic]

Conclusions: I was unable to obtain an odor violation with the Nasal Ranger. There was odor from the facility, but the intensity appeared to shift with the wind movement. It proved difficult to lock onto the smell and go through the odor levels of the Nasal Ranger before the smell intensity decreased and the smell shifted to different areas of the road. The facility is making progress on their compliance plan to mitigate the odors.

Concern Info: ***Web form***
I live at 1715 South Moffet ave. I Joplin Missouri. At 4am my house started absorbing a horrible smell resembling a burning corpse and indescribable chemical mixture that I for sure have NEVER smelled before.
Whatever it is appeared to have pooled together like a gas (similar to butane) and concentrated in corners without much air flow and near doors and windows.
My hepa filters, and the UV filters had no effect in reducing the smell. It pooled so heavy that it made my eyes burn.
I had c no choice but to open my house up and force it out with fans.
Outside, the smell pooled heaving in my and my neighbors backyard and areas that have little air flow. And less strong in the street where the wind was gently blowing.
It appeared to be coming from the south but I am unaware if it was southeast or southwest because the orientation of my home, being in the middle of the block along with a large church wall extending most of the block behind it.
Google suggest that I am experiencing VOC's from a food processing plant [sic]

Conclusions: CON-2899

I did not observe any violations during this investigation. No action is required.

Concern Info: ***web form***
I would like to report hazardous health conditions to the neighborhood at these addresses. This location has a half burnt down house that is dilapidated and has been that way for years. The owners instead of fixing or removing the house have placed a camper in the yard and live out of that. The property is unstable and rotting. The yards are cluttered with trash and broken down vehicles. These conditions are causing massive amounts of rodents, predator animals ie coyotes, scavenger animals and insect infestations. Please inspect these properties. Thank you. [sic]

Conclusions: CON-2900
No violations of 10 CSR 10-6.045 Open Burning Requirements were observed during the site investigation. No further action is required. No solid waste violations were observed during site investigation.

66300	05/18/2026	05/18/2026	EnerSys Enery Products, Inc.	Fugitive Particulate Matter	Warrensburg /Johnson	KCRO	MC	Other

Concerned Party: Anonymous

Concern Info: From Webform Email. New Report an Environmental Concern 80111. Submitted at 12:19 am Monday, May 18, 2026.Date of Incident or Date First Noticed 04/01/2026.

I am writing to formally request an immediate investigation and localized air/soil testing regarding a chronic, heavy powder and particulate fallout blanketed over our residential area. This material heavily coats personal vehicles, residential roofs, and outdoor surfaces.This is a community-wide issue. Multiple residents in the neighborhoods immediately surrounding the plant are actively documenting and discussing identical heavy buildup on their properties via local community forums.
This fallout is directly triggered and severely worsened every time it rains. Rainwater appears to be stripping a heavy volume of airborne industrial particulates out of the sky (wet deposition), leaving behind a thick, dirty, powdery film on our vehicles as the water evaporates Our neighborhood is fully paved with no gravel roads nearby. Furthermore, our immediate area is heavily surrounded and shielded by mature trees and tall buildings. This structural layout rules out natural road dust, agricultural runoff, or windblown soil, indicating a heavy industrial source from the nearby facility.
This heavy contamination has been constant and immediate since moving closer to the facility.
Given that EnerSys is a lead-acid battery manufacturing plant with a documented history of Clean Air Act reporting violations regarding its baghouse filtration systems, we are deeply concerned that this chronic fallout contains hazardous airborne lead oxide or chemical manufacturing byproducts.
We urgently request that the Missouri DNR/EPA deploy an environmental inspector to conduct surface wipe sampling, soil testing, and localized ambient air monitoring in the residential areas immediately downwind of the Warrensburg plant to identify the exact chemical composition of this powder and enforce necessary emissions controls. [sic]

Conclusions: The facility appears to be in compliance with emission limits. No visible emissions were observed from the facility, and no unusual depositions were observed in the surrounding areas.

Visible deposits after rain are common, as rain collects atmospheric dust, pollen, and other particulates, such as smoke from wildfires and land management fires. The particulates often travel hundreds of miles from their origin.

66302	05/15/2026	05/21/2026	Keith Sampson	Open Burning Odor	Neosho /Newton	SWRO	GE	Phone Conversation

Concerned Party: James Ryan

Concern Info: On Tuesday, May 12, 2026, Keith Sampson was burning misc. building materials and tires which caused property damage to a neighboring property owned by the father of James Ryan at 12676 Falcon Rd. The property damage at 12676 Falcon Rd included a burned car in which the gas tank exploded, a garage, an outbuilding, building materials that were stored on the side of the outbuilding, and many trees. The fire that began at Keith Sampsons property continues to smolder releasing offensive odors and causing concern for the potential of further damage. The fire department did extinguish the initial fire on May 12th. James Ryan has contacted the fire marshal and an attorney to report the damage to his property. [sic]

Conclusions: CON-2905
Solid waste was promiscuously dumped and fire was set by unknown individuals.

66316	05/18/2026	05/18/2026	Mercy Hospital South	Other	St. Louis /St. Louis	SLRO	RA	

Concerned Party: Anonymous

Concern Info: This correspondence serves as a Second Formal Notice regarding the ongoing and unmitigated environmental, occupational safety, and ADA related hazards occurring within the Environmental Services (EVS) department at Mercy Hospital South, 10010 Kennerly Road, St. Louis, Missouri 63128. These conditions were previously reported, yet the facility has failed to implement corrective actions, allowing the hazards to persist and escalate.

The EVS workspace remains positioned directly adjacent to the hospital power plant and an active mechanical room, exposing workers to continuous fumes, sewer gas, airborne particulates, and mechanical exhaust. Multiple floor drains—including one that has repeatedly emitted sewer odors—indicate failures in trap seals and ventilation integrity. EVS employees continue to sit, huddle, and sign in for their shifts in this contaminated environment due to the absence of a designated break area.

These conditions violate:

• OSHA 29 CFR 1910.141 — Sanitation and Ventilation
• OSHA 29 CFR 1910.1000 — Air Contaminants
• CMS Conditions of Participation – Physical Environment (42 CFR §482.41)
• Joint Commission EC.02.05.01 — Utility System Risks
• ADA Title I and II — Safe, Accessible Workspaces
• Missouri DNR Indoor Air Quality Standards
• EPA Region 7 Hazardous Air Pollutant Oversight

This request is made pursuant to:

• OSHA 29 CFR 1910.1026 — Hexavalent Chromium Standard
• EPA Clean Water Act and Safe Drinking Water Act
• EPA Region 7 Hazardous Air Pollutant Authority
• CMS Conditions of Participation – Physical Environment
• Joint Commission EC.02.05.01 and EC.02.02.01
• Missouri DNR Water and Air Quality Oversight

[sic]

Conclusions: This facility is located within St. Louis County. I referred the concern to St. Louis County Department of Public Health APCP.

66324	05/19/2026	05/19/2026	John D Miller Custom Homes LLC	Other Asbestos	Platte City /Platte	KCRO	MU	Email

Concerned Party: Rob Kornacki

Concern Info: I believe (?) the address to be 13350 Dowling Lane, Platte City, MO 64079-9201. No address shown outside, as house has been vacant and crumbling for many years. This old dwelling is being razed for new development. I know the house to contain asbestos, as the owner told me of such before he died. He told me asbestos was in shingles and likely insulation. I can give details of what he told me if contacted... The destruction of the old house and new owner seems to make ZERO concessions to state and federal environmental provisions. The shovel operator whom I just spoke to told me the asbestos was removed. This I doubt, as two huge piles of debris remain...no doubt soon to be hauled off to some disposal site with no provisions for hazardous waste (my thought). I also feel for the operator as he has no protective gear whatever. Please evaluate on site and respond. This wreckage will likely be removed quickly as whatever the local equivalent of "shoot, shovel, shut-up" probably applies. [sic]

Conclusions: Demolition was not against regulations. Company is working on getting the waste removed from the site. Demolition does not fall into the asbestos regulations.

Concern No.	Received Date	Investigation Date	Suspected Source Owner/Operator	Concern Type(s)	City/County	Region	Inspector Initials	Final Action
66326	05/11/2026	05/13/2026	BigFoot RV Campground	Unpermitted Facility Open Burning	West Plains /Howell	SERO	TC	Referred to Other Agency

Concerned Party: Phillip Adams

Concern Info: Concerned party states that the Bigfoot RV campground does not have adequate sewage facilities and is dumping wastewater on the ground. Additionally, CP states that the campground is bringing in RVs, tearing them down, for the usable parts and burning the rest. CP recommends contacting the Howell county sheriffs department before going to the property as he believes the RP may be belligerent. [sic]

Conclusions: While researching the area of concern it was noted that Bigfoot RV Park is a Limited Liability Company that was incorporated on May 10, 2021. Its Charter Number is LC1786314. The RV Park does not have a permit from the Department of Natural Resources.

On May 15th, I drove by the area of concern. From the county road I did not see any evidence of wastewater runoff, or any indications of illicit burning. I noted that there were three RV campers on the property.

On May 18th, I spoke with the concerned party on the phone. It was discussed with him that from the road, I did not see any evidence of sewer runoff coming from the RVs. I also explained that I would be forwarding to the Howell County Health Department. Due to the campgrounds flow of less than 3000 gallons per day it would fall under the local health department.

Concern Info: Sent: Tuesday, May 19, 2026 9:51 AM
Subject: REGUARDING BUILDING

I sent John Hoover a message.....asked him not to burn anymore.....as we smelled the burning , my son sent him a mes. and asked if they were burning , he told my son yes, ...then i sent him a mes. and asked him to stop burning as it was causing us health issues.....he replied they were not burning...a lie.....and said a neighbor might be burning .....on Hoovers ground...on the north side is two places where they tried burning the siding...they tried after dark.....their has been no other effert to remove the building.....i looked up Jackson co's laws for out here.....they do not follow them...and as for epa.....the siding being burnt is a no.....and the material has to have harmful chemicals in them....from the autos seats and rubber parts burnt...which can only be removed by taking to a landfill.....my husband...passed in 2009..he and my son both had to pass a class in EPA. chemicals...with their work.....so we are very aware of the chemical and harm they can do to a person.....Someone needs to get out here and take pics of the burnt sideing on the ground....and do something about it. Sinserely Sandy Taylor.....their was a huge pile of siding in the front.....that most likely was what we smelled burning, but not for sure..... [sic]

Conclusions: No violations could be confirmed during the investigation. Information about the open burning regulations, including specific information about burning of untreated wood from demolition, was provided.

66330	05/19/2026	05/19/2026	Westwind Poultry Farms LLC	Odor	Macon /Macon	NERO	DB	Site Visit

Concerned Party: Anonymous

Concern Info: Web form states "I would like to complain about the smell coming from the chicken hatchery located at 308 Lake St Macon, MO. As the weather warms up the smell has become worse. I believe that they put the chicken waste and dead chicks in container outside the business. The wind carries the awful smell to the area businesses and homes. It's going to be even worse as the summer heat rises. Could you please see if there's something that can be done to control the smell they are creating? Thank you" [sic]

Conclusions: Found odors 5:1 DT, no violation of the odor rule found. Discussed odor rule with facility. Facility hatches chickens, stated they dispose of males at landfill and mortalities do not stay on site more than 24 hours.

66333	05/18/2026	05/19/2026	Raul Cortez	Open Burning	Slater /Saline	NERO	DB	Site Visit

Concerned Party: Kath Meyer

Concern Info: Website concern states "Our neighbor burns every evening as soon as it starts to get dark and it burns all night. No idea what it is, but it smells awful all night. It’s not just regular tree trimmings or anything like that. He has a basic junk yard in his yard. My husband says he thinks he’s burning wire or something from the vehicles he has setting around. Idk but it’s smells terrible and I wake up every morning with a sinus headache and can’t breathe. I worry about the kids directly next to him, between my house and his." [sic]

Conclusions: No violation of the open burning rule identified. At site, discussed with resident. He showed two burn barrels containing household trash, stove heat with wood, and a burn pile he said was for softening pipe for bending which I observed contained burned wood and small amounts of trash. Provided information.

66334	05/13/2026	05/13/2026	Bonoe Quarries West Columbia	Fugitive Particulate Matter	Columbia /Boone	NERO	DB	Phone Conversation

Concerned Party: Emma Leto

Concern Info: Caller reports that dust from Boone Quarries West has been impacting the neighborhood south of the quarry. Caller states that dust is routinely found on cars and houses throughout the neighborhood. Provided caller with contact information to The Department of Public Safety’s Division of Fire Safety which regulates blasting at quarries. [sic]

Conclusions: No violation of the dust rule was found during the on-site investigation. Discussed with quarry representative, also notified nearby concrete plant of concern.

66337	05/20/2026	05/20/2026	City of Springfield Yard Waste Recycling Center	Open Burning Odor Fugitive Particulate Matter	Brookline /Greene	SWRO	JW	Phone Conversation

Concerned Party: Jason Hicks

Concern Info: Report to EPA Incident Tracking says: "Over a 39 day period between March 31 and May 9 2026, residents of Springfield Missouri were subjected to two separate governmental burn events originating west of the city. Both events produced measurable air quality impacts across a densely populated metro area of 170,000 people. On March 31, Wilson's Creek National Battlefield conducted a prescribed burn with no public notification to Springfield residents. On May 8-9, the City of Springfield conducted a multi-day open burn of storm debris at the Yardwaste Recycling Center, also west of the city. Prevailing winds on both dates carried smoke directly east over the entire metro area. During both events, official air quality monitoring showed no deviation from baseline. Springfield has two state monitoring stations covering the entire city, neither positioned to detect localized burn events. On March 31 and May 9, a consumer-grade thermostat at my residence triggered an Unhealthy AQI alert while official monitoring showed 28. Residents across the city independently reported smoke inside their homes, ash on vehicles outside city limits, and smoke odor on clothing. No public health guidance accompanied either burn. Residents had no way to know their air was unhealthy except through personal consumer devices. Missouri's own open burning regulations prohibit burns constituting a public health nuisance. The monitoring infrastructure cannot verify compliance with that standard during localized events. I am requesting review of both events and an assessment of whether Springfield's current air quality monitoring is adequate to protect residents during localized governmental burn activity. [sic]

Conclusions: CON-2978
I did not observe any violations during this investigation. No action is required.

66370	05/15/2026		Alan and Leslie Butler	Open Burning	Nelson /Saline	NERO	NR	Communication In Person

Concerned Party: Anonymous

Concern Info: Caller reports Alan and Leslie Butler have been routinely burning the insulation off wire in burn barrel behind the mobile home on their property. Caller did not know the exact address, stated that they live across the street from 119 Main Street. Google shows the address as 128 South Main Street, Nelson. Caller also stated Dominic Wood or Hall also burns at this location. [sic]

Conclusions: On May 19th, 2026 at 11:20AM I spoke with Leslie Butler and her uncle Alan Butler. They showed me a small burn barrel with household trash; they also showed me a small pile of coated wire. When asked what they intended to do with the wire, Alan said he planned to "scrap it, he just hadn't had the chance yet." I explained we had a concern filed with our office that he may have been burning coated wire. He said, "I haven't burned anything in days because it's been way too dry, but I don't burn that wire because the recycling center doesn't like it burned." I related it is good the recycling center does not have him burn the insulation off the wires because that would be against the open burning regulations in the State of Missouri. I gave him a fact sheet on what he is allowed to burn under Missouri regulations, as well as my business card and asked to give us a call if he ever has any questions regarding open burning regulations. No violations of the Missouri Open Burning Regulation were observed at the time of the investigation. No further action is required to address this concern.

Concerned Party: Anonymous

Concern Info: CP states: Dumping sewage on or around Hwy 8, CP states that they believe they had dumped into the nearby creek. Usually the smell is stronger in the evening around 5 pm. Rotten egg smell enough to make your eye water and burn. The smell will take your breath away. CP states that the odor has reached inside her home even, causing issues for her dog. She stated the smell can be reached all the way to Roy's station and the storage facilities. [sic]

Conclusions: On May 19, 2026, I contacted the City of Leadwood's Case Manager, Madisyn Branch. I asked Madisyn Branch if the City of Leadwood had signed their AOC, and if SERO could be of assistance in getting the AOC signed. Madisyn stated that there wouldn't be much SERO could do as an office because the city's engineer continues to want reevaluation of the AOC before the city signs. Madisyn stated that she would reach out to the city's engineer to see about getting the AOC signed, and that she would let us know if there is anything we can do as an office to assist.

66399	05/11/2026	05/12/2026	Residential	Open Burning	Fenton /Jefferson	SLRO	LZ	

Concerned Party: Anonymous

Concern Info: We received an anonymous concern from our DNR website. The CP states "I am reporting a recurring violation of the Missouri open burning regulations (10 CSR 10-6.045). People at the homes of 729 Turnbridge Dr and 1842 Waybridge Ln are frequently burning large amounts of cut-down trees, limbs, and brush in their backyard. As we are currently within the state-mandated restricted period (April 15 through September 15), this disposal of vegetative waste is prohibited. These are not small, 4'x4' recreational campfires; they are large-scale disposal fires. The smoke is heavy, persistent, and creates a significant air quality nuisance for the surrounding properties. None of us can open our windows and enjoy the cool temperatures. I am requesting an inspection to see if this is authorized. If it is not, then the responsible party be warned continued violations may lead to legal action." [sic]

Conclusions: I investigated the concern on May 12, 2026. I met the RP, Ms. Sarah Rogers (1842 Way bridge Lane). I provided my identification and told her the reason for my visit. She told me they burned trees they are forced to cut after storm damage. They burned tree limbs, and brushes laid down in their backyard after lightning damaged a lot of the trees. This was disposal of vegetative waste (not chemical treated wood, plastic, or tires, which is prohibited). This was a onetime burning they are forced to do to get rid of all the damaged woods.

Concern Info: From Webform Email.New Report an Environmental Concern 80431. Submitted at 10:00 pm Thursday, May 21, 2026. Date of Incident or Date First Noticed 05/01/2026.

People live in a house that should be condemned. They dump feces into the rain drains at Olive and Vine. These people keep Burning rubber and plastic im assuming trash and it stinks up the neighborhood. I have contacted local police and city multiple times regarding the issues with this property and nothing is ever done. Something needs to be done about this guy's issues he is causing. This has to be air quality issues! [sic]

Conclusions: No violations were observed during the investigation. It appeared only household trash was being burned. A compliance assistance letter will be sent to the resident with information on the open burning regulation.

Concern No.	Received Date	Investigation Date	Suspected Source Owner/Operator	Concern Type(s)	City/County	Region	Inspector Initials	Final Action
66415	05/20/2026	05/22/2026	Unknown	Other	/Nodaway	KCRO	MC	Other

Concerned Party: Anonymous

Concern Info: CP wished to remain anonymous for their safety, multiple farmers in the area have been affected and are calling
Stated the Clean Skies Act listed DNR as being able to investigate these concerns if/when House Bill 2656 and 2388 are passed, they wanted to get ahead of the legislation and let us know this was going on for about a year now. Its caused health concerns (rash, eyes swollen shut)
Two planes (slightly larger than crop duster planes, not yellow) are cloud seeding and causing farms to flood. They usually fly over on M,T,W but most recently it happened this last weekend. The planes fly SE from the direction of Maryville towards Conception Junction and further south towards Barnard and loop back north. [sic]

Conclusions: The concern involves mobile sources (aircraft), which is outside the department's regulatory delegation; therefore, the concern was referred to EPA. For more information, refer to EPA's website: https://www.epa.gov/regulations-emissions-vehicles-and-engines/Contrails. EPA information on geoengineering can also be found here.

Information on this concern was also sent to the Missouri Department of Agriculture in case the concern involves a pesticide applicator.

66417	05/22/2026	05/29/2026	Mary DeMaranville	Open Burning	Harrisonville /Cass	KCRO	CK	Site Visit

Concerned Party: Anonymous

Concern Info: Via Webform email - Submitted at 1:05 pm Friday, May 22, 2026 - Date of Incident or First Noticed: 05/20/2026

Saw large amount of black smoke coming from field and smelled plastic in the air. [sic]

Conclusions: The homeowner denied any burning in a field. Homeowner reports that they have a trash pickup dumpster that is at her daughter's home, which they share. She stated that her husband will burn old hay in the fall, but nothing like that has been burned recently. I reviewed regulatory material on prohibited items, and the homeowner stated they do not burn any of those items. Open burning regulatory information was left for the homeowner to review.

Concerned Party: Anonymous

Concern Info: Initial Interview
Via webform: "I am submitting an anonymous complaint regarding an ongoing severe sewage/waste odor affecting residential properties near a septic/waste handling operation in the Carterville/Jasper County area. On 5th and Walnut. The Company is C&L grease and spetic.

The odor is constant and overwhelming to the point residents cannot safely or comfortably go outside their homes. The smell resembles raw sewage and has persisted for an extended period of time. Multiple residents have reportedly made complaints already with little or no resolution.

This issue is substantially affecting quality of life and may represent improper waste handling, wastewater disposal, runoff, lagoon management, spraying practices, or another environmental/public health concern.

Residents are experiencing:

inability to use yards or outdoor areas,
nausea/headaches from odor exposure,
persistent sewage smell surrounding homes,
daily recurring odor events.

Please investigate the property, disposal practices, air quality concerns, wastewater handling, and any possible violations of environmental or nuisance regulations.

Residents are afraid of retaliation and therefore wish to remain anonymous." [sic]

Conclusions: CON-3075
I did not observe any violations during this investigation. No action is required.

Concerned Party: Veronica Corn

Concern Info: Via webform: "On Saturday, May 16th, 2026, while driving home from a friend's home to the East of town, we noticed a terrible odor coming from the Midwest Organic Solutions (located directly east of the town of Jasper, MO). However, by the time we reached our home within the town of Jasper, we didn't smell it any longer.

On Friday, May 22nd, 2026 I had our windows open at home and the whole day it was the same awful odor that we smelled when driving directly past Midwest Organic Solutions [sic]

Conclusions: CON-3081
I did not observe any violations during this investigation. No action is required.

Concerned Party: Laura Earl

Concern Info: Via Webform: "The smell at our house and even in the town of Jasper this weekend is rancid from Midwest Organic. There are facebook post about it smelling like dead fish Friday night and it smelled like rotten carcasses at our house on Saturday night and Sunday. Every weekend is horrible. The number of trucks that go in there on Friday and Saturday is ridiculous. MoDot had to use a snow plow to clean off the road Friday from the debris coming off trucks entering and exiting the facility. Someone needs to work a few weekends to assess this situation! We send messages on the weekend and it was Tuesday afternoon when I finally received a response last time. I am not sure how they were issued a composting permit at the beginning of May when they are taking industrial waste. Laws have been passed. It is time to update the permits. This is taking too long. He also operated from January to May without a permit which is against the law."
Driving Directions

66443	05/22/2026	05/22/2026	Mid-Continent Industrial Services	Fugitive Particulate Matter	Kansas City /Jackson	KCRO	MC	Referred to Other Agency

Concerned Party: Anonymous

Concern Info: EPA forwarded this concern to the department on 05/22/2026
EPA report a violation date: 05/14/2026
EPA incident received date: 05/21/2026
Incident description: This is a sandblasting company. They do not contain the material after products are sandblasted. The media, mixed with paint, metals and whatever else comes off of and out of the tanks they are blasting, freely billows into the air. The doors to the sandblasting area are almost always open, and even when they are closed they do not contain the media and huge gaps are visible allowing for particulates to constantly flow into the air. This metal and polluted media covers neighboring buildings, vehicles are covered daily. It fills the gutters of the streets which flow into the sewer and into the river. This location is right next to the Missouri River and several walking/biking trails including the Heritage Riverfront Trail and the Greenline, cause users to inhale the constant flow of dust being pumped into the air. [sic]

Conclusions: The department's Kansas City Regional Office conducted a hazardous waste inspection at the site in March and required the facility to make a waste determination. While waiting for TCLP sample results, more waste accumulated than what is likely normal for the facility. Test results recently came back as non-hazardous, so the facility should start shipping the waste off-site soon.

This facility is located with the city limits of Kansas City, MO; therefore, the concern was referred to the delegated local agency, which is the City of Kansas City Health Department's Air Quality Proram.

66445	05/21/2026	05/21/2026	Mercy Hospital South	Hazardous Waste Containers	St. Louis /St. Louis	SLRO	ML	

Concerned Party: Anonymous

Concern Info: To Whom It May Concern,

This correspondence serves as a Second Formal Notice regarding the ongoing and unmitigated environmental, occupational safety, and ADA related hazards occurring within the Environmental Services (EVS) department at Mercy Hospital South, 10010 Kennerly Road, St. Louis, Missouri 63128. These conditions were previously reported, yet the facility has failed to implement corrective actions, allowing the hazards to persist and escalate.

The EVS workspace remains positioned directly adjacent to the hospital power plant and an active mechanical room, exposing workers to continuous fumes, sewer gas, airborne particulates, and mechanical exhaust. Multiple floor drains—including one that has repeatedly emitted sewer odors—indicate failures in trap seals and ventilation integrity. EVS employees continue to sit, huddle, and sign in for their shifts in this contaminated environment due to the absence of a designated break area. [sic]

Conclusions: Referred to DHSS

66447	05/26/2026	05/26/2026	City of Carterville	Odor	Carterville /Jasper	SWRO	JW	Phone Conversation

Concerned Party: Anonymous

Concern Info: Caller states that heavy rains lead to an "unbearable sewage stench" emanating out of manholes in Carterville, MO. The caller lives northeast of Carterville Elementary School. The caller states that the odors from the city sewage system have worsened in the past year [sic]

Conclusions: CON-3100
I did not observe any violations during this investigation. No action is required.

66449	05/22/2026	05/22/2026	Matt Culp	Open Dumps Open Burning	Hannibal /Marion	NERO	BH	

Concerned Party: Anonymous

Concern Info: Citizen of Hannibal called to give notice of Joe Culp burying shingles on property owned by his father Billy Joe Culp. Property is a mess. They have burned material in their yard at times. Joe Culp has buried multiple piles of shingles right behind and to the rear of the trailer. Caller also states that they are also burying on the railroad property. Citizen of Hannibal also states that there is an additional house down the street that is full of tires and shingles inside of home. It has been abandoned for 20 years or more and it is owned by Ralph Fogle. City of Hannibal won't do anything about this. Hopefully we will get things done and get them to clean up the area in and around their homes. [sic]

Conclusions:

66450	05/27/2026	05/27/2026	Zimmerman	Odor	Purdin /Linn	NERO	DB	Other

Concerned Party: Anonymous

Concern Info: Online report states "The concern is the horrid odor coming from the commercial laying hens barns that have been built in the past year. The lingering smell makes it difficult for those who live in this area to enjoy their own yard and to go outside. The smell could be damaging to local livestock too." [sic]

Conclusions: CAFO odors are only regulated when from a Class 1A CAFO. This is not a Class 1A, and is therefore not regulated for odors. During prior phone contact with Dwight Zimmerman dated February 27, 2025, he inquired about requirements for construction of an egg laying CAFO containing less than 1,000 animal units in Linn County. No action required.

66452	05/20/2026		Tanner Peniston	Asbestos Open Dumps: Construction and Demolition	Chillicothe /	NERO	NR	Email

Concerned Party: Anonymous

Concern Info: Received a typewritten letter, via U.S. Mail, with no contact information or return address. Letter stated "Demolition has begun at 1 Henry Street Chillicothe, Missouri, the former MFA elevator." [sic]

Conclusions: Jacob Cross confirmed no work had been started on 5/20/2026 on his way home from work.

I spoke with Tanner Peniston via phone on 5/21/2026. Tanner confirmed he intends to tear down just the elevator and is waiting to be awarded a grant from the city of Chillicothe to do so. I informed Tanner, before he begins work, he will need to have an asbestos inspection done on the elevator and submit a notification of demolition and renovation before he begins work. He said he understood and on 5/27/2026 I sent him an email outlining the steps to have an inspection done and submit the notification. That email also listed a link for Missouri Landfills that accept friable asbestos and fact sheets on asbestos requirements for demolition and the Missouri Fugitive dust rule. I asked him to give us a call if he had and questions before or during his work.

No violation of the Missouri Asbestos requirements, Demolition requirements or Missouri Fugitive Dust rule observed as demolition has not yet started. No further action required at this time.

66455	05/27/2026	06/04/2026	Dylan Burns	Odor	Jasper /Jasper	SWRO	JW	Phone Conversation

Concerned Party: Sarah Stefan

Concern Info: The caller states that she lives west of the facility and has smelled "tremendously bad odor inside [her] house" for the past 2 days. The caller is worried about the health of her children since they play outside often. The caller states that the odor from the facility has never been this strong before. [sic]

Conclusions: CON-3124
I did not observe any violations during this investigation. No action is required.

Concern No.	Received Date	Investigation Date	Suspected Source Owner/Operator	Concern Type(s)	City/County	Region	Inspector Initials	Final Action
66463	05/28/2026	05/29/2026	Royal Street Extension	Open Burning Land Disturbance	Harrisonville /Cass	KCRO	CK	Phone Conversation

Concerned Party: Gary Miller

Concern Info: Caller reports about 5 acres of a wood lot was bulldozed digging up the root balls and pushing trees down. The trees are now being burned. They began a few days ago and it's still going. Not sure if it will finish over the weekend. Caller does not see any silt fencing up as well. [sic]

Conclusions: The Fire Marshal for Harrisonville shut down the operation of the air curtain destructor (ACD) the previous day, so I was unable to observe the ACD in operation. Regulatory material and ACD operating guidelines were provided to the excavation company and the fire Marshal so they could work together to ensure that the ACD was not releasing ash and high levels of smoke. No violations noted at time of investigation.

Concerned Party: Jennifer Ruiz Calderon

Concern Info: From submitted at 4:20 p.m. Saturday, May 23, 2026. The is a St. Louis area specific form; St. Louis Regional Office forwarded concern to Kansas City Regional Office Wednesday, May 27, 2026.

Experienced Odor Date and Time: Aug 20, 2025 8:00 am

Experienced Odor Duration: More than 2 hours

Experienced Odor Description: Fishy, Manure or Farm Animals, Rotten Eggs, Rancid or Rotten

Experienced Odor Intensity: Strong or Offensive

Experienced Odor Address and/or Location Description:
1805 N Ponca Dr Independence Missouri 64058
The whole block area all the way to the top of the stop sign Grove Dr.

Potential Source: Some neighbors have dogs and other animals. Don't know if their poops are being picked up and being cleaned but the odor is bad everyday. Last more than 2 hours. [sic]

Conclusions: No strong odors were detected in the area. Odor source could not be identified, but based on observations and description provided by concerned party, source is not regulated by the department. Email was sent to the concerned party with findings and recommendation to contact the City’s codes enforcement.

Concern No.	Received Date	Investigation Date	Suspected Source Owner/Operator	Concern Type(s)	City/County	Region	Inspector Initials	Final Action
66475	05/28/2026	05/28/2026	Tyson Foods, Inc.	Odor	Concordia /Lafayette	KCRO	MC	Other

Concerned Party: Anonymous

Concern Info: The Tyson plant in Concordia Missouria has been emitting a putrid odor for well over 1 year. It does not matter which way the wind is blowing, the stench lingers. On still high humidity nights, the smell seeps into houses, causing the homes to smell the next day. They are emitting loud noises from the plant as well which has exceeded 70 decibels from 1/2 mile away according to my NIOSH SLM app on my cellphone. Their lagoons smell awful as well, and I'm not sure they are in compliance with them either. [sic]

Conclusions: A similar concern was received by the department on 05/21/2026 and investigated 05/27/2026. During the investigation on 05/27/2026, strong odors were observed from the lagoon, but the odors were below the regulatory threshold. The facility is working on short-term and long-term improvements, including additional aeration, to improve the odor.

Concerned Party: Deborah Probert

Concern Info: Caller states that odor from Midwest Organic Solutions is consistently drifting 3 miles west into the town of Jasper during easterly winds. The caller reported multiple events in which she woke up in the middle of the night because of the odor. The caller has been recording the timing and wind direction of each odor disturbance: May 22 at 6:06am with 6-12 mph ESE winds, May 25 at 6:49pm with 6-9 ESE mph winds, May 26 at 7:53pm with 6-12 mph ESE winds, May 27 at 2:43am with 5-9 mph SE winds, May 28 at 8:12am and 8:43 pm with 9-22 mph ESE winds, and May 29 at 7:43m with 5-9 mph ENE winds [sic]

Conclusions: CON-3161
I did not observe any violations during this investigation. No action is required.

Concern No.	Received Date	Investigation Date	Suspected Source Owner/Operator	Concern Type(s)	City/County	Region	Inspector Initials	Final Action
66480	05/28/2026	06/02/2026	Micah Cross	Odor	Urbana /Hickory	SWRO	BS	

Concerned Party: Wanda Brown

Concern Info: Caller states Micah Cross owns 6 acres of property and is stockpiling and selling fertilizer, and the odor is bad. Cross gets materials for fertilizing from poultry barns in Arkansas and other materials. Cross occasionally puts sawdust or sprays the piles, but smell is still bad. [sic]

Conclusions: CON-3136

No violations of 10 CSR 10-6.165 Restriction of Emission of Odors were observed during the site investigation. No further action is required

Concern No.	Received Date	Investigation Date	Suspected Source Owner/Operator	Concern Type(s)	City/County	Region	Inspector Initials	Final Action
66492	05/08/2026	05/14/2026	Scott Moore	Open Burning	Salisbury /Chariton	NERO	NR	

Concerned Party: Anonymous

Concern Info: "Weber ave Salisbury Missouri. Old abondoned homes being tore down. Hauled off to owner (Scott Moore) to burn or bury."

"In town" "Weber ave Salisbury, Missouri. 65281" [sic]

Conclusions: Weather conditions; 11:40am, 70°, 15mph NNW, 34% Humidity.

On May 14, 2026, I conducted an onsite investigation into the reported concern. I conducted the investigation during normal business hours. Prior notification of the concern was not provided to the property owner. Upon arrival in Salisbury, I drove up and down Weber Avenue looking for empty lots or homes who appeared to be in the process of demolition. I found one address; 410 South Weber, Salisbury, Chariton County. This address had a small pile of debris and a graded gravel lot. There was no evidence of burning at this site. I checked Chariton GIS and found Scott Moore to be the owner of the property.

I found another address along the length of Weber Avenue; 310 North Weber Avenue, Salisbury, Chariton County. This address had snow fence around the property and a dilapidated home within the fence. I checked this address on Chariton GIS and it belonged to Laura Johnson.

Chariton GIS also listed the grocery store in town, "Apple Market" as belonging to Scott Moore. I stopped into the store and asked to speak with the manager and explained I was trying to make contract with Scott Moore and asked for Scott's phone number. The manager gave me Scott's number and I made contact with Scott on May 15, 2026. Scott confirmed he owned the lot at 410 South Weber, Salisbury, Chariton County and confirmed he had hired a contractor to tear the house down. He said the contractor had hauled the debris to a landfill in Columbia, Missouri. I asked him to email me the receipts from the landfill. He emailed those to me on May 19, 2026 as well as a scrap receipt. I also explained during our phone call on May 15, 2026 he would need to fill out an asbestos notification after the fact and file that with Jefferson City and emailed that form to him.

During our phone call on May 15, 2026, Scott also confirmed he had purchased 310 North Weber Avenue, Salisbury, Chariton County as well and did intend to tear it down and haul it off as well. I explained to Scott, he would need to have an asbestos inspection performed on this home before he had it torn down and emailed him a link to an asbestos notification form, a list of Missouri asbestos inspectors and shared Senora Cressman's contact information in Jefferson City DNR office to answer any questions he had on filling out forms etc.

Senora received an asbestos notification for 410 South Weber, Salisbury, Chariton County and 310 North Weber Salisbury, Chariton County on May 22, 2026. Notification number D13168-2026.

Violations of the Missouri Air Conservation Commission asbestos regulations were observed at the time of the investigation. Since the structure at 410 South Weber Avenue, Salisbury, Chariton County was already disposed and an asbestos inspection could not be performed, an asbestos demolition notification form is required. A demolition notification for 310 North Weber Avenue, Salisbury, Chariton County is needed before demolition begins. A demolition notification was received on May 22, 2026, notification number D13168-2026.

66495	04/29/2026	04/29/2026	Village of Raymondville	Asbestos General Water Quality	/Texas	SERO	HC	Site Visit

Concerned Party: Pennny Couchman

Concern Info: From CP: I am concerned about Asbestos in my area The Village of Raymondville to be exact Last year I could not access water and sewer because of Asbestos in the lines NO IMPROVEMENTS HAVE BEEN MADE NOW THEY DEMAND THAT I ACCESS THESES SAME LINE . No improvements have been made in this village since before the 1980's The Village of Raymondville is not willing to provide me with accurate and updated information. My neighbor has a positive asbestos in his lines. So I need some answers this is concerning because asbestos is harmful and causes many diseases I am a concerned for the community [sic]

Conclusions: Tony Kerley, an Environmental Program Specialist with the department conducted an inspection of Raymondville's drinking water system April 29, 2026. The operators demonstrated knowledge of the present asbestos in their system. They showed understanding of asbestos management within their system and knowledge of proper handling. Asbestos piping is considered a widely used material in piping systems.
I attempted to contact the concerned party via email, but have not received a response at this time.

66499	05/29/2026	06/03/2026	MFA Feed Mill - Aurora	Fugitive Particulate Matter Odor	Aurora /Lawrence	SWRO	JW	Communication In Person

Concerned Party: Anonymous

Concern Info: FROM EPA WEBFROM: The exhuast from the huge feed mill in town makes the air thick and hard to breath. They let out exhaust, mostly overnight, which is so thick you can see the particles in the air. They look brown and are especially visible when they are suspended in humidity. The exhaust leaves yellowish brown residue all over the ground, car hoods, and etc. every week. It could be chemicals. The smell is like badly burnt stew, only stronger, and smells toxic. It is so terrible that it nearly knocks you down when you go outside. She has to use her asthma inhaler when she opens the door. She has also heard other people complain about the odor and getting COPD from the particles in the air. A friend's husband talked to the city about the bad air problem 12 years ago and was told that nothing would ever be done about the feed mill exhaust because it was too big of an employer in the town. Aurora is a very tight knit community where personal politics keeps things from getting done. People are aftraid to complain because the people who work there get mad when they do [sic]

Conclusions: CON-3167
I did not observe any violations during this investigation. No action is required.

66509	05/22/2026	05/22/2026	Lakewood Hills Subdivision	Asbestos Public Water System Operations Other	Pacific /Jefferson	SLRO	AB	

Concerned Party: Rebecca Sacco

Concern Info: Dear Missouri Department of Natural Resources Drinking Water Program,

I am writing as a concerned resident/community member regarding the Lakewood Hills water system in Jefferson County, Missouri, currently operated by Liberty Utilities.

Myself and other residents recently became aware that portions of the neighborhood water infrastructure may contain asbestos cement (AC) pipe. In addition, the neighborhood has experienced multiple water main breaks and boil orders over the years, raising concerns about the condition of the infrastructure and any potential public health implications associated with deteriorating AC pipe materials.

I am seeking both guidance and public information regarding this situation. Specifically, I would appreciate assistance with the following:

Any records identifying the pipe materials used within the Lakewood Hills water system, including asbestos cement pipe inventories, maps, or infrastructure assessments.
Any sanitary surveys, inspection reports, compliance reports, engineering evaluations, or correspondence related to the condition of the Lakewood Hills water system.
Any records concerning boil orders, water main breaks, leaks, emergency repairs, or water quality concerns affecting Lakewood Hills from January 1, 2020 to present.
Any information regarding whether deteriorating or damaged asbestos cement water pipes present a potential health concern to residents, particularly in areas experiencing repeated pipe failures or service disruptions.
Guidance on what steps residents should take if they are concerned about possible exposure risks, infrastructure deterioration, or water quality issues.
Information regarding what agency or process residents should use to formally report concerns or request investigation of aging water infrastructure.

If possible, I request that responsive records be provided electronically via email to resacco2@att.net.

Thank you for your time and assistance. I appreciate any guidance your office can provide regarding this matter and the appropriate next steps for residents. [sic]

Conclusions: The custodian of records should reach out to her and provide requested info. We will reach out with sampling results once those are completed.

Concern No.	Received Date	Investigation Date	Suspected Source Owner/Operator	Concern Type(s)	City/County	Region	Inspector Initials	Final Action
66510	05/15/2026		Thomas "Tommy" Swaim	Open Burning	Martinsburg /Audrain	NERO	NR	

Concerned Party: Dale Hackman, Judy Taylor, Kenneth Garlanc

Concern Info: Caller reports that somebody burned a mobile home and a well house. According to the caller, the responsible party had been ordered to remove mobile home from the concern property, but elected to burn it and the well house instead. The burning reportedly was conducted on May 12, 2026. The caller reported the concern on behalf of the property owners, and is concerned about harmful toxins released from the burn.

*Note - Permission was granted over the phone for department staff to access the property. [sic]

Conclusions: On May 21, 2026, I conducted an onsite investigation into the reported concern at 16310 State Highway A, Martinsburg. Property owner, Judy Garland gave us permission to enter the property via telephone when she called in the concern on Tommy Swaim who I assume was renting the property from Judy and owned the mobile home on the property. When I arrived, I observed trees still standing along four sides of the yard had burn marks and charring, and tree just inside the yard was burned down to a stump, indicating a very large, very hot fire. In the center of the yard was littered with a small amount of house material and a few concrete blocks dispersed through recently leveled dirt. East the yard was a pile of housing material mixed in with tree trunks and tree branches that had been burned as well. A few of the items in this pile included metal, rope, aluminum cans, plywood, metal siding trim, metal pipe, a partially burnt garden hose, a metal oil pan, plastic jugs.

Tommy Swaim pulled in the driveway as I was finishing taking pictures. I introduced myself, handed him my business card and explained the purpose of my visit. Tommy explained the house had caught fire and burned down recently and Tommy had called the fire department and everything out here. He confirmed the fire took place on May 12th, 2026. I asked if he had been living in the home when this happened. He said he had not. He explained they had been working on emptying the home as they had plans to haul it out of there. I asked if the fire department had made a report yet and Tommy said he was unsure, but he shared that the Martinsburg fire department had been the department that responded and he thought the fire chief's name was Chris Lloyd. When asked what he had done with what was left of the house after the fire, he replied there was not much left, most of it burned up in the fire. He did say he had scrapped the metal frame of the trailer, and he would email me a copy of the receipt from the scrap yard. I provided Tommy with a copy of Missouri Open Burning regulations and explained that houses cannot be burned as a means of disposal. I explained that I would contact the fire chief and ask for his report and then contact Tommy with a determination after we received a copy of the fire chief's report.

I received a copy of the scrap tickets from Tommy by email on May 22, 2026.

On June 2, 2026, I made contact with Josh Lloyd of the Martinsburg Volunteer Fire Department. Josh explained Tommy had made contact with the fire department prior to burning a brush pile and they mutually agreed it was a wet pile and something Tommy could contain. When Tommy had begun burning the brush pile it caught the house and a shed on fire. Tommy then called a friend, Justin Fennewald who volunteers with the fire department and reported the fire had gotten out of control. Justin Fennewald then made contact with Josh Lloyd and requested use of the fire truck to go out to the fire and watch the fire. Josh Lloyd granted that request. The fire department was never dispatched to the scene and therefore no report of the fire exists. Josh Lloyd also reported the house had been undergoing demolition for quite some time and mentioned specifically the flooring had been removed and taken to the school to be repurposed and the metal house roof, that he estimated to be only 2 years old, had been removed by a local farmer to be repurposed for his hog farm.

Martinsburg Volunteer Fire Department informed me this was an accidental fire initiated by an intentional brush fire that got out of hand and spread to accidentally burn the house and shed. The fire department was never dispatched to the fire, so no report exists to review.

Demolition of home had already begun, no fire report exists. Determined house was burned intentionally which is in Violation of Missouri Open Burning Regulations. Letter of Unsatisfactory finding, response required is being sent to Thomas Swaim.

Concerned Party: Laura Earl

Concern Info: Midwest Organics - air and water concerns. Today the smell at my house is off the charts. Please come to my yard on a still day and take readings. This morning the air was not moving and it was so bad. We luckily have two houses (this is our farm house we use more this time of year) we have had to leave and go to our other the last two weekends. The air is giving my husband respiratory issues. If we leave quick enough when symptoms come on he gets over it in 24 hours after moving to the other house. One time we tried to tough it out because he had work that needed done on the farm and he sick for over a week. I know we are not the only family that has had health issues. This is a public health concern!

Also, we have had a great deal of rain and the run off from that facility needs tested. Our animals and wildlife deserve better than to drink contamination from his facility. [sic]

Conclusions: CON-3177
I did not observe any violations during this investigation. No action is required.

Concerned Party: Anonymous

Concern Info: Caller states that a contractor has been burning construction waste at a home building site. When asked how long the construction has been going on the caller replied that the construction has been going on for a couple of months. Caller said they are burning scrap wood, paper, plastic, Styrofoam and other material. Caller said that the building is located on NE 781, 2nd drive on left off C. The caller also told me that the owner was named Cameron and could be reached at 210-749-0700.

I then called Cameron, and we discussed the issues with burning on the property. Cameron said that the burning was going on approximately 45 feet away from building. Cameron said that they had called the contractor about a fire occurring with no running water. During this conversation the contractor told Cameron that they (the contractor) commonly burn construction waste.
Cameron then told me they had an inspector review the building site. Cameron said the inspector documented the burn location and identified some of the material burned. The inspection was Jacob Coburn with Springfield Home and Property Inspection Services LLC. Coburn can be reached at 417-370-5410.

Cameron also told me that they have trail cam pictures and video of fire, and that the fire occurred on January 19. Cameron said there has been another contractor on the site completing work which may have impacted the evidence. Cameron also said they had connected with other property owners that have had issues with the same contractor and mentioned David Hudginson 417-880-3168 and Dan Naes 720-415-6906.

Cameron said the burn pile was 8-10' and 30' around and consisted of ICF blocks, paint cans, every single type of waste excluding wood, and they could hear explosions. Cameron said a worker blocked one camera while on call, but the owners were viewing the situation from another camera. Cameron said that the workers moved vehicles after telling owner fire wasn't hot. The building started in July of last year, and just got dried in. Toward the end of the conversation, Cameron told me that the inspector found the burn location was approximately 60 feet from the structure, and was 16 feet in diameter. Cameron also mentioned the contractor(s) have a history of legal issues that were public record (Missouri Case.Net?) [sic]

Conclusions: CON-3208
Based on limited visual inspection of the property there were no solid waste or open burning violations at the time of the investigation.

66522	06/01/2026	06/03/2026	Unknown	Animal Waste Odor	Kirbyville /Taney	SWRO	KC	Site Visit

Concerned Party: Randy Wade

Concern Info: rec'd via EPA Region 7 - CP states:
The smell of rotten eggs and sulfer is so strong I can't open my windows. I'm allergic to sulfer and I repeatedly have to take medication to help with the asthma from the sulfer in the air. Most times it's so thick you can taste and feel it on your. it just gets stronger and stronger by the month to the point you can smell it before you even drive into desloge. [sic]

Conclusions: Upon receiving the concern, I reached out to the concerned party to gain additional information and let them know how the department observes odor concerns.
On May 19, 2026, I arrived to the general area and attempted to observe the odor in various parts of the region around Mississippi Lime Company, MLC. No sulfur odor was detectable during the odor investigation. I then arrived on site and spoke with Keith Kauffman, Operator. I asked if there had been any changes or malfunctions on site that would cause them to produce a stronger sulfur odor than typical. He stated that they had not, but that the week I mentioned the odors were observed was a week where the atmospheric pressure was high, meaning the odor would stay around longer and travel further than usual. I thanked Mr. Kauffman for his time before leaving the site.
I attempted to call the concerned party back on June 2, 2026, but their voicemail was full.

66545	05/14/2026	05/15/2026	Royal Oak Charcoal Plant	Other	Salem /Dent	SERO	LR	Phone Conversation

Concerned Party: Jessica Elliot

Concern Info: CP states:
Living in the area by Royal Oak plant, everyday there is a THICK dark colored dust that covers everything outside. Swimming pool and picnic tables outside covered so thick, while cleaning or being outdoor cause you to cough. Family member has developed COPD recently and believes the two things could be related. Very concerned for the air quality for everyone in the area. [sic]

Conclusions: On May 15, 2026, I contacted the Concerned Party and discussed the concern. During the conversation, they stated that black dust was present every day. They agreed to meet me at their property/home on May 18, 2026.
On May 18, 2026, I arrived at Ms. Elliot's property at approximately 1:20 PM. We discussed the concern and she began to show me around the property. There was dust and pollen coating multiple surfaces around the property, but I was unable to observe any obvious black/dark colored dust at the time of my investigation. Ms. Elliot stated that she had recently cleaned off the porch, where the dust is usually the worst. She then explained that it was not as bad this time of year because of all the trees in between her property and the facility. She stated that when the leaves were gone, it was much more noticeable. I encouraged her to reach back out if there were significant increases in the dark colored dust, be it in the near future, or after the leaves fall off the trees. I then left her property. At the end of her driveway, I attempted to observe fugitive emissions leaving the facility's property, but I did not notice any smoke or dust.
On May 21, I talked to Brian Matt, EHS Manager, and he stated that he would reach out to the plant to verify that they are controlling fugitive emissions and dust as required.

66547	05/14/2026	05/19/2026	Unknown	Other	Park Hills /St. Francois	SERO	JE	Site Visit

Concerned Party: Loretta Boesing

Concern Info: Received by email: Strong smell of sulfer/rotten eggs. Many complaints across the cities of Park Hills & Desloge from many residents on community group Facebook pages. ReWorld borders my backyard but several other businesses or other places could be a cause as well I personally smelled the rotten egg smell from my backyard and the smell continued to the Desloge Police Dept. The smell was noted in community groups from Central Highschool to Desloge Police Dept. The smell has been occurring since 5/10 and seems to get worse in the evenings. Unsure of where issue is coming from but ReWorld, Polysol LLC, and other facilities nearby. [sic]

Conclusions: Upon receiving the call, I reached out to the concerned party and to the City of Park Hills- Code Enforcement to gain additional information on the odor and concern. I left voicemails with both individuals but did not hear back.
On May 19, 2026, I visited the area and attempted to observe any identifiable odors prior to arriving at the facility of Reworld. No distinguishable odors were observed, sulfur or otherwise. I then arrived at the facility and spoke with Chris Roberts, Facility Manager, KC Wulf, Area Manager, and Mark Stevens, Operations Foreman. I informed them of the concern received and asked if any of the work they had been conducting would produce a sulfur odor. It was stated that at this time Reworld was still just processing alternative engineering fuel, AEF, but have not started to use their vaults for processing solid waste. We walked the facility to observe current operations and discussed future plans. I then closed out my meeting with them and requested that if they begin processing solid waste to let the department know.
I then continued my odor monitoring and was unable to identify any sulfur odor. I then visited Mississippi Lime Company, MLC, in Bonne Terre as they can produce a sulfur odor from time to time. Operations were standard and they had not had any sort of malfunctions that would result in excessive amounts of sulfur odor. Keith Kauffman, Operations, stated that there had been some high atmospheric pressure days the week I mentioned the odors were reported. This would cause their sulfur odor to stay around longer, and travel farther than it typically does.
Following the investigations, I reached back out to the concerned party and left a voicemail. I have not heard back from them at this time.

Concerned Party: Norma Wesolowski

Concern Info: John & Becky Camp are piling up material to burn at the edge of their property, including treated wood, Styrofoam, and other materials. This pile has not yet been burnt, but they likely will burn soon. [sic]

Conclusions: On May 26, 2026, Lyndsey Rightnowar, Environmental Specialist and I arrived on site. We met with Jim Camp and discussed the nature of the concern. I asked about open burning and Mr. Camp stated that they have not burned anything in weeks and when they do burn, they burn only vegetative wastes. I explained that treated wood is not allowed to be burned in Missouri. I offered Fact Sheets pertaining to open burning and solid waste disposal to Mr. Camp, but he did not take them. Mr. Camp also declined to provide contact information. After a discussion of the concern and open burning regulations, we walked to the burn pile. There were some pieces of lumber on the pile, but I could not discern if the lumber was treated. There was also what appeared to be a plastic or Styrofoam cooler on the pile, but nothing had been burnt. I did not see any indication of burning of unallowed materials on the property,
On May 26, 2026, I spoke with Rebecca Camp on the phone. She stated that the lumber on the pile was not treated and had come from a recent cleaning project. It had been used for shelving and was placed on the pile in error. We discussed the concern and my findings from the visit to the property. I discussed the open burning regulations with her and advised her to pull the cooler off of the burn pile and to ensure that the wood was not treated prior to any burning.
On June 2, 2026, Jesse Evans, Environmental Supervisor, conducted a drive by of the property and observed that no material remained in the burn spot and it did not appear that anything had been burned. Jesse and Josh Wilkerson, Air/ Land Section Chief, spoke with Mr. Camp via phone and discussed open burning regulations and how that pertains to Mr. and Mrs. Camp since they operate a business out of their residence. It was discussed that open burning of vegetative waste generated on site is permitted, but discouraged the burning of residential waste since it would be difficult to discern if the waste originated from the business or residential side of the property. Mrs. Camp then called back after the discussion. We clarified with her as well on what is permissible to open burn. We reiterated that it is not recommended to burn residential waste and things such as carboard because of the nuance of them having a business associated with their residence. We again confirmed that vegetative wastes could be burned.

66583	06/05/2026	06/05/2026	Bevier C-4 School	Asbestos	Bevier /Macon	NERO	DB	

Concerned Party: JERED WISDOM

Concern Info: "On May 18, 2026 I was made aware that high school students at Bevier C-4 had been enlisted by the school to assist with a "community" project. The part of the project in question is that the students removed old ceiling tile from the basement ceiling and just threw them into a roll off dumpster outside. The school cannot provide me with an asbestos management plan and they cannot provide me with any analysis results on whether or not these tiles contained asbestos. These are teenagers, they did not wear any PPE, they were not aware of the potential hazards, and they were not careful in the removal of the tiles. In other words, the tiles were torn during the removal process. My son was part of this event. As a parent I was not asked if my student could participate in any sort of community event, much less being potentially exposed to asbestos. He is 15 years old, some of his peers are not even that old." [sic]

Conclusions: Failure to inspect. School signed contract with Terracon later same day (June 5) to get a full AHERA inspection done. Will likely issue UF or LOW

66592	04/24/2026	05/01/2026	Sheila Gerlt	Open Burning Open Dumps	Armstrong /Howard	NERO	BM	Letter AC

Concerned Party: Derrick Hill

Concern Info: I am writing to report ongoing illegal activity at an abandoned property located at 301 Snoddy St., Armstrong, Missouri 65230.
Individuals have been gathering on the property and surrounding land, and I have observed them burning prohibited materials, including plastic, tires, and other non-approved waste. This activity appears to be recurring and not a one-time incident.
Based on my understanding, this conduct is in violation of:
- Missouri Air Conservation Regulations (10 CSR 10-6.045 – Open Burning Restrictions), which prohibit the open burning of materials such as rubber, plastics, and other petroleum-based products
- Missouri Solid Waste Management Law (RSMo Chapter 260), which restricts improper disposal of solid waste, including burning non-approved materials
- Federal Clean Air Act regulations enforced by the U.S. Environmental Protection Agency (EPA), which prohibit the open burning of hazardous materials due to the release of toxic pollutants
In addition to environmental concerns, the activity may also present public health and safety risks, as well as potential illegal drug use or trespassing occurring at the site.
I respectfully request that the Missouri Department of Natural Resources investigate this matter and take appropriate enforcement action to stop the illegal burning and ensure the property is brought into compliance.
Thank you for your time and attention to this matter." [sic]

Conclusions: At the time of the investigation a small burn area was observed adjacent to the driveway. Only vegetative waste was observed in the burn area. It appeared someone is in the process of cleaning up the property and organizing materials into piles. No one was available at the property during the investigation. Informational letter is being sent to the property owner.

Concerned Party: Amber Holt

Concern Info: Received by email from WPP program. CP States: Subject: 11561 COUNTY ROAD 7070 WEST PLAINS MO 65775
Hello,
The above listed address has a lagoon that is reeking and smells are coming into neighboring homes.
This lagoon is right by a property line as well as a county road.
This needs to be addressed asap as this is creating breathing problems for the neighbors.

Best Regards,
Amber Holt [sic]

Conclusions: On June 1, 2026, I emailed the concerned party this email:

"Good morning,

I am reaching out in regards to the environmental concern I received regarding a lagoon with bad odor in Howell County. Please give me a call at your earliest convenience to discuss.

Thank you and have a great day!"

The concerned party called me shortly after sending the email, and we discussed the concern. She explained that her neighbors built a new house with a lagoon. She confirmed that her address is 11553 CR 7070 West Plains MO, and the lagoon is right next to her property. She did not have an exact house number for the property with the lagoon, but that it is on the same property as 11561 and 11557 that share the same driveway/gate. She explained that the lagoon is full and has a strong foul odor that travels onto her property. I asked if the lagoon has ever overflowed or discharged, and she stated that it has not to her knowledge. Her main concern was the bad odor coming from the lagoon. I explained that single family residential lagoons with one service connection are regulated by the Department of Health and Senior Services, and that it is difficult to trigger an odor violation from a lagoon. I explained that I would reach out to our Air Pollution Unit to see if someone from their unit could investigate.

Later that day, Hayden Cassinger with the Air Pollution Unit made contact with the concerned party and was granted access to her property. He made a site visit and he did not detect an odor coming from the lagoon at that time.

On June 5, 2026, I called the concerned party and provided her with an update. I explained that Hayden had not detected an odor at the time of his site visit, but that I would forward the concern over to the Department of Health and Senior Services for their awareness.
The concern involves a single family residential lagoon with a single connection and will be referred to the Department of Health and Senior Services for their awareness.

66605	06/04/2026	06/05/2026	Jim Lattman	Asbestos Open Burning	Rhineland /Montgomery	SLRO	MC	

Concerned Party: Anonymous

Concern Info: We received an email from the asbestos group in the central office. They spoke to an anonymous caller located at 219 Americus Rd, Rhineland, MO 65069. In the screen shot below (see email), this property has the red location mark on it. The owner of the property is Jim/James Lattman. The property owner has a gray minivan and gray truck. The property owner is removing building materials from a residential structure located on the property and burning/buried the items in the back yard. According to the concerned citizen, some of the materials being burned and improperly disposed of is asbestos transite siding. The burn pile is close to Dry Fork Creek. The same property owner also converted a chicken barn into a residential structure. According to the concerned citizen, the property did not install a proper septic tank which could cause potential ground water concerns. [sic]

Conclusions: No violations were seen during the investigation in regard to open burning including the open burning of ACM. Another concern document (CON-3278) will contain WPC's findings.

66614	06/04/2026	06/08/2026	City of Sullivan	Odor	Sullivan /Crawford	SERO	HG	Phone Conversation

Concerned Party: Heather Wilkinson

Concern Info: CP States: Have a lift station behind their home. It always stinks so bad. It has these old sand bags stacked around it that have been there forever. CP has contacted the city multiple times about the issue but haven't had any luck getting it fixed. [sic]

Conclusions: I contacted the City of Sullivan and spoke with Dalton. He said that the lift station was on their system. He was not aware of any issues, but that they had received a ton of rain so it might have issues. He said that they would send someone out to ensure that it is operating correctly.

I received a call back from the City of Sullivan. He said that the lift station was functioning as designed and was not overflowing. The sandbags was to help divert stormwater. He did mention that they had a complaint about the smell at this house about a week ago, but wasn't sure exactly what's going on. He was looking into a few solutions but thought that the issue had been resolved. I informed him that my unit did not regulate odor and that they should work with the property owner to resolve the issue. He said that they would continue to try to resolve the odor issue.

I contacted the Concerned Party (CP) and informed her of my findings including that there were no current issues with the lift station and no wastewater flowing out of it. I further informed her that the city was willing to work with her to help manage the odor. I recommended she contact the city and work with the wastewater operators to resolve the issue. She was content with my findings.
No water quality issues observed.

Concern Info: Submitted via webform email. New Report an Environmental Concern 81616 Environmental Concern. Date of Incident or Date First Noticed
06/04/2026. Submitted at 5:36 pm Wednesday, June 10, 2026.

Gravel quarry in Bates City, Mid-States Materials is running loud equipment that is likely above decibel range. It makes a scratching sound like fingernails on blackboard but not as high pitched. It can be heard a mile away and they run that machine all day. It is irritating to hear and I'm concerned that the constant noise could be harmful for babies, children, heart patients and veterans. I hope you are the correct ones that can help because it seems to be bad noise pollution bleeding over into a large residential community of mainly senior citizens and some young couples with babies/children. [sic]

Conclusions: Noise pollution is not regulated by the department. I emailed the company's environmental manager, Nicholas Jackson, to inform the company of the concern. Jackson shared the message with other company employees. Cole Anderson stated the company has no equipment at the site.

66688	06/11/2026	06/12/2026	Brett Ferguson	Open Burning	Buckner /Jackson	KCRO	CK	Phone Conversation

Concerned Party: Jessie Hill

Concern Info: Concerned party reports that his neighbor is burning his household trash and it smells like plastic. Ferguson has upped his game and now has two burn barrels. Now that the Unincorporated Jackson County Burn Ban Ordinance 6082 has been passed, Ferguson can no longer burn his household trash, and the concerned party would like the Department of Natural Resources to address Ferguson's burning. During the initial interview, the department advised the concerned party that the ordinance is to be enforced by county officials, fire districts, and law enforcement, but the concerned party disagreed since the ordinance says, "Violations may be referred to state authorities." [sic]

Conclusions: Fort Osage Fire Protection District responded to the incident. According to the incident report, only common household trash was found to be burning. After reviewing the provided report and photos, no violation of Missouri’s open burning regulation was found. Local officials informed the responsible party of a new county regulation prohibiting the burning of household waste.

Concern No.	Received Date	Investigation Date	Suspected Source Owner/Operator	Concern Type(s)	City/County	Region	Inspector Initials	Final Action
66689	06/12/2026	06/16/2026	Drew Long, Owner	Open Burning	St. Joseph /Buchanan	KCRO	JS	Other

Concerned Party: Anonymous

Concern Info: Concerned party reports that trash is being brought onto the property (approximately 10 acres) and put in a pile, which can be seen on the north side of the property but maybe not from the road. Then there is constant burning at the pile. The burning is not just household trash.

A second part of the concern is that they have a large piece of heavy equipment (described as the size of a tractor, 10,000 lbs) that is sitting in the creek directly behind the house. Concerned party wonders if this is a violation since it is sitting in a waterway. Would like the department to look into this. [sic]

Conclusions: Drew Long stated only brush and household trash from the property were burned on the property, but he would not grant access to the property to confirm. The open burning regulation was explained, and a copy of the open burning regulation and a fact sheet on open burning were provided.

66691	05/18/2026	05/21/2026	Mercy South Hospital	Other	St. Louis /St. Louis	SLRO	JW	

Concerned Party: Whitney Lammert

Concern Info: Email received by the APCP and forwarded to the SLRO (attached). Concern regarding ongoing and unmitigated environmental, occupational safety, and ADA related Hazards within the Environmental Services department at Mercy South Hospital.

The EVS workspace remains positioned directly adjacent to the hospital power plant and an active mechanical room, exposing workers to continuous fumes, sewer gas, airborne particulates, and mechanical exhaust. Multiple floor drains—including one that has repeatedly emitted sewer odors—indicate failures in trap seals and ventilation integrity. EVS employees continue to sit, huddle, and sign in for their shifts in this contaminated environment due to the absence of a designated break area. [sic]

Conclusions: SLRO staff inspected the land disturbance and hazardous waste generation sites and will issue inspection reports. The concerns listed in the email appear to be health and safety concerns related to the ongoing construction activities at the hospital and worker exposure. The facility is served drinking water by Missouri American Water and construction activities would not impact the drinking water supply. The facility discharges wastewater to the MSD service area. Any wastewater from the facility is treated at a MSD facility and not directly discharged. The correspondence was forwarded to OSHA, MO DHSS, and St. Louis County Air Program for review.

66697	06/12/2026		Dylan Burns	Odor	Jasper /Jasper	SWRO	JW	

Concerned Party: Matthew Newman

Concern Info: Via web form: Hazardous, horrendous odor coming from Midwest Organic Solutions LLC, affected the outdoor air quality at my home from Saturday June 6th through Thursday June 11th due to south winds, with the worst level of smells from 5pm-9am each day. Some nights the odor was detected in our home with windows and doors shut. The facility operated without a DNR permit for multiple months and our concerned community has notified a law firm of the negligence by the DNR in this matter. [sic]

Conclusions: CON-3407

66698	06/12/2026	06/17/2026	Jerry Odom	Open Burning	Forsyth /Taney	SWRO	JM	Site Visit LOW

Concerned Party: Anonymous

Concern Info: CP stated that a structure was burned today behind the Uhaul storage facility on Bethany Rd. CP stated that the fire was out but there are shingles and cinder blocks still in the burn pile. [sic]

Conclusions: CON-3404

Improper disposal of durable goods and demolition debris is in violation of 10 CSR 10-6.045 Open Burning Requirements and Missouri Solid Waste Law and Regulations Section 260.210 RSMo. Odom signed an acknowledgement of the regulations, and a Letter of Warning was issued.

66715	05/28/2026	06/01/2026	Unknown	Other	Willow Springs /Howell	SERO	HC	Site Visit

Concerned Party: Anonymous

Concern Info: CP States: They have witnessed on multiple occasions and even videoed a gentleman pouring what appears and smells to be diesel into a burn pit. It was originally a stump being burned out, now it's a burn pit that they continue to pour diesel into to burn stuff. CP is concerned the fuel will contaminate the soil and nearby gardens. There is also a nearby wet weather creek they are concerned could be contaminated by runoff. They said he pours so much diesel that it can be smelled in the air for hours. The burn pit area is behind the house in the back yard, towards the right side of property if facing the house from the road. [sic]

Conclusions: I arrived on site at 11:00 a.m., I drove several passes through the area. There was a faint diesel odor in the area, but no burning was observed. There was a pile of vegetative waste which did have several tires near the pile.
On June 4, 2026, I spoke with Willow Springs City Hall to provide awareness of the situation even though there were no current violations noted.

66717	05/26/2026	06/01/2026	Ty Kohen	Odor	Mountain Grove /Texas	SERO	HC	Site Visit

Concerned Party: Mike Pinson

Concern Info: A new chicken house has been built and the odor is bad. They built this chicken house within 500 feet of house & church. The individuals that lived close by had to move due to the odor being so bad. The residence around this area are having issues with the bad odor. The chicken house is spreading fresh litter on the ground which adds to the bad odor. The CP is not sure the runoff is being dealt with properly. CP states he will be glad to talk to discuss if any questions. [sic]

Conclusions: I arrived around 12:00 p.m., and at the time of the inspection there wasn't anyone on site. After several minutes of attempting to make contact I left a copy of "Requirements and Best Management Practices for Temporary Stockpiles of Poultry Litter and Other Dry Process Waste - PUB2503","Animal Feeding Operation Permits and Regulations in Missouri - PUB2351" and "Manure Export Guidance" as well as a business card. I approached a home located at 10650 Fowler Dr, and spoke with a resident. The resident stated that the odor is worse when cleaning or when the doors are open on the houses. I conducted odor observations with the nasal ranger following the department's standard operating procedure. There were no odor violations noted at the time of the investigation.
On June 4, 2026, I spoke with the concerned party (CP) who explained their concerns while I explained the findings and conclusion of the investigation.

66726	06/09/2026	06/16/2026	Jerry Dooling	Permitting	Holts Summit /Callaway	NERO	EN	

Concerned Party: Anonymous

Concern Info: Received via web mail: I was contacted about a possible unpermitted limestone mining operation that is happening in Callaway County and was asked to send pictures and info to you. This person/company is fully operating and mining with crusher and sorter, equipment, breaking rock, stockpiles, etc. The whole hillside has already been affected. Possible stream also affected. Concerned about no mining, air, or water permits. [sic]

Conclusions: On June 16, 2026, I , Ethan Nicoli, went to the quarry site to investigate the concern. When I arrived I observed a limestone quarry operation. I met with Jerry Dooling and explained to him that to operate a quarry in the state of Missouri, you are required to have a permit. I handed Jerry Dooling a form E application and walked him through how to fill out the form. After this I concluded the investigation. See report for details.

66740	06/11/2026	06/12/2026	Mike Strother	Other	Bragg City /Pemiscot	SERO	BC	Phone Conversation

Concerned Party: Anonymous

Concern Info: Received by email. CP States: Mike Strother and his sons was cleaning up a around a old yesterday there was piles of tires old shingles oil in buckets and trash he takes a tractor and blade and moves it to the back left hand side of the property and then digs a big hole and pushs it in there he plans to tear down the old barn and trailer house and camper and put trees over them and burn them this week [sic]

Conclusions: On June 12, 2026, I traveled to the concern location. I attempted to make contact while on site and did not see anyone on site. I observed a trailer on the right side of the property from State Highway A. I also observed a large brush pile on the left side of the property. I called the number provided on the concern and made contact with Mike Strother. Mr. Strother stated he and his father recently purchased the property and were in the process of clearing the property to add grain bins. Mr. Strother offered to meet me at the property to conduct a walk through the site.
Once Mr. Strother arrived, we observed the piles on site and he explained the process being utilized to clean up the property. Mr. Strother stated the house trailer on site would be dismantled and the metal portions would scrapped. The rest would be disposed of via permitted solid waste facility. We discussed the camper on site as well as the items piled in front of the camper. Mr. Strother stated the same process would be followed with these items, what could be recycled would be and rest would be disposed of via a solid waste facility. We then observed the brush pile on site. Mr. Strother stated that a burn pile existed in this area prior to him purchasing the property so they utilized the area to put a brush pile. Mr. Strother stated they had only placed brush on the pile. I observed a few items immediately in front of the brush pile such as vinyl siding and shingles. Mr. Strother stated they would remove these items before burning the brush pile but the items were placed there by the previous owners. I did not observe items on any other side of the brush pile. I supplied Mr. Strother with several publications on proper waste management as well as proper scrap tire and used oil management. We discussed proper disposal of various items he may encounter during property clean up. I thanked him for his time and left the site.

66787	06/15/2026	06/25/2026	Michael Effertz Farms LLC	Open Dumps Asbestos	Belton /Cass	KCRO	MS	Phone Conversation

Concerned Party: Jim Lillig

Concern Info: Copied from EPA online form:

"This property was originally farmland and later had a main farmhouse and a few smaller homes, likely with septic systems. Different tenants used the property for business purposes. One tenant operated a dump truck business and worked on trucks and equipment in a shop on the property. Another tenant operated an appliance repair business and stored large amounts of appliances on-site. I have concerns that oils, hydraulic fluids, refrigerants, solvents, and other chemicals were dumped directly on the dirt. One building used as a mechanic shop had a dirt floor, which raises concerns that fluids may have leaked directly into the ground. The main residence reportedly contained asbestos and was condemned due to its condition, but people continued living there. The house was later destroyed by fire. At the time, the owner was Mick Effert. Mick Effert hired Dick Robinson / R.E. Robinson Construction to clean up parts of the property. There are still piles of debris on-site, and it appears some material may have been buried. I do have pictures of these conditions. After it was “cleaned up” they planted crops. There are still existing piles out there of the debris as well. There is a creek/river that is not too far from where all this took place. The City, owner, and Scannell properties are in the preliminary planning portion of wanting to put 7 large warehouses over the affected land. Thank you for your time". [sic]

Conclusions: No further action.

66791	06/15/2026	06/16/2026	Unknown	Odor	/St. Louis	SLRO	RA	

Concerned Party: Anonymous

Concern Info: We received a odor concern from the DNR Website. The CP states: There has been many nights over the last few months where all of a sudden a strong odor outside starts creeping into my home. It seems to happen all over the city of Valley Park at random times . It is a very pungent smell and has a skunky smell but it overtakes blocks at a time so there is no way it from an actual skunk. Right now at the moment it smells like it is coming from back behind Leonard street, but I have also smelled this smell many times down by St. Louis avenue on different nights. If I was to guess it’s some sort of sewer smell.

Driving Directions
141 to Marshall and then a left on to fifth or sixth street and take that back to Leonard Ave. But like I said it always happens at night and it’s not every night it’s random nights and it happens all over the area down here [sic]

Conclusions: Valley Park is located in St. Louis County. I referred the concern to St. Louis County Dept. of Public Health.

Concern No.	Received Date	Investigation Date	Suspected Source Owner/Operator	Concern Type(s)	City/County	Region	Inspector Initials	Final Action
66792	06/12/2026	06/16/2026	Unknown	Odor	/St. Louis	SLRO	RA	

Concerned Party: David

Concern Info: We received 3 identical odor concern from the DNR website. The CP states: 0.1 mile in the Ruth Park Nature Trail. The odor was very strong and smelled like rotten eggs, sewer gas, and possibly chemical solvent. There’s underground plastic pipe leads towards close water body.
Driving Directions
Drive north McKnight Rd. To the Ruth park natural trail head. Park by the side of the street [sic]

Conclusions: This concern is located in University City. I referred the concern to St. Louis County Dept of Public Health APCP.

Concern No.	Received Date	Investigation Date	Suspected Source Owner/Operator	Concern Type(s)	City/County	Region	Inspector Initials	Final Action
66793	06/11/2026	06/11/2026	Residential	Asbestos	St. Louis /St. Louis City	SLRO	RA	

Concerned Party: Paula-Breonne Vickers

Concern Info: We received an asbestos concern from the DNR website. The CP states: The location is 4512 Ashland Ave., Saint Louis, MO 63115

This property was demolished under an "emergency" demolition without permits, a year after the May 16, 2025 tornado in Saint Louis. The home was demolished without environmental permits so it was not cleared and it is fully contaminated with asbestos. I live in the house next door, well lived, I have not been able to be in my home since because of the toxins released and left in the air. The demolition spilled onto my property. It has been over a month and the asbestos contaminated rubble has been left to absorb into the ground and blow in the air. [sic]

Conclusions: This asbestos concern is located within St. Louis City. The concern was referred to St. Louis Dept. of Health APCP.

66795	05/18/2026	05/20/2026	Liberty Utilities	Asbestos	Pacific /Jefferson	SLRO	AE	

Concerned Party: John Leuchtmann

Concern Info: We received an asbestos concern from the DNR website. The CP states: Liberty Utilities had a subcontract to perform a repair to the existing water main in our Lakewood Hills neighborhood on Wildwood Dr on Friday May 15th. Upon inspection of the work area this afternoon Sunday, May 17 the subcontractor left pieces of broken transite (Asbestos Concrete Pipe) water pipe sitting on the side of the road along Wildwood Dr. There are no containment bags or anything of the sorts for the damaged section of asbestos line, they left out in the open near the roadway of Wildwood Dr.
Driving Directions
Take Highway O out of Pacific turn left onto Highway F continue down to Doc Sargent Road on the right hand side, continue down until Wildwood Drive follow back and the worksite is on the right [sic]

Conclusions: 5/20/26-ANE: I performed a site visit and spoke with two representatives of Liberty Utilities, Caleb and Rob, who were onsite backfilling the piping run and finishing grading the area where the pipe had been repaired. The area of the patch was approximately 10 feet long (see attached pictures). The representatives stated that the piping that was removed from the site was approximately 2 linear feet, made of concrete, and had been removed from the site by their contractor previously to my site visit. The contractor and Liberty had presumed the piping to be asbestos containing material (ACM) and was double bagged and disposed of accordingly.
Conclusions
A site investigation was performed on 5/20/2026. No asbestos containing piping was observed at the site the time of the site visit.

66796	06/04/2026	06/08/2026	Thomas Richardson	Hazardous Air Pollutant Release	Arnold /Jefferson	SLRO	AE	

Concerned Party: Barbara Koen

Concern Info: We received an environmental concern from the EER about an alleged spill and hazardous pollutant release. The CP states that Tommy Richardson is running an illegal mechanic business out of his private residence at 1391 Wayne Drive. Oil and gasoline are released or dumped from his mechanic work, leaving his property, and have impacted the elderly neighbor's yard at 1397 Wayne Drive. The caller also had concerns about painting fumes and paint being released in this location as well. This concern is being forwarded to the St. Louis Regional Office for investigation. [sic]

Conclusions: 6/8/26-ANE- I went to the site of concern with Lemma Zewdie and spoke with the homeowner (Thomas Nicholson) and his two daughters who were onsite. With their permission, we looked into the garage and walked around the outside of the home. While there were cars in various state of repair there was no evidence of dumping or spills. Mr. Nicholson stated that he takes used oil or gasoline offsite to dispose of properly. He also stated that all vehicles are owned by him and it is his hobby to repair cars.
Conclusions
I conducted a site investigation on June 8th, 2026. I was given permission by the homeowner to look in his garage and walk around his property and I did not find violations during the investigation.

Concern No.	Received Date	Investigation Date	Suspected Source Owner/Operator	Concern Type(s)	City/County	Region	Inspector Initials	Final Action
66803	06/03/2026	06/03/2026	Kimmswick Transfer Station	Transfer Station Odor Stormwater Contamination	Kimmswick /Jefferson	SLRO	JV	

Concerned Party: Emily Kessler

Concern Info: The transfer station located in the town of Kimmswick, Mo always smells so bad in the evenings. It's disgusting and unbearable to be outside. The facility is piled high with mounds and mounds of trash they are not transferring out and leave it there for it to stink up the entire town, schools, and houses in the area. It also brings in a lot of unwanted animals.

The facility is surrounded by homes, a grade school, middle school, and highschool as well as 2 parks. There is also a creek that feeds into the Mississippi that run around the facility and the trash that comes from the facility and trucks litter the street and the waterway. [sic]

Conclusions: There was no evidence that the waste for the transfer station is staying on site more than 24 hours. However, the amount of waste left at the end of the day was concerning and would potentially be a problem for both odors and creating a vector issue. Waste Management is aware of the concerns and is allegedly taking steps to ensure less waste is left on site at the end of the work day.

66821	06/07/2026		Unknown	Asbestos Open Burning	/Ozark	SWRO	JW	

Concerned Party: unknown

Concern Info: We received an environmental concern from an individual who would like to remain anonymous. See the google image below. The concern citizen indicated that a commercial structure located west of the Fountain Church (directly across 160 from the Cash Saver Pantry) was recently demolish and the waste was burned onsite. The concern citizen indicated that the structure contained asbestos and the ACM was not removed prior to the demolition. The structure was used as restaurant and maybe the office of Sierra Ozark Corporation. Sierra Ozark Corporation recent sold the property to a new owner. The concern citizen does not know who the new owner is. We checked our notification systems and the department has not received a notification for this structure. Please let me know if you have any questions. [sic]

Conclusions: CON-3576

Concern Info: Subject: Request for Immediate Enforcement Action Against Mirror Lake Resort for Ongoing Illegal Burning and Dumping
I am submitting this formal complaint regarding the ongoing dumping and burning of potentially hazardous waste materials by the owners of Mirror Lake Resort, John and Becky Camp.
For over two years, I have repeatedly reported what I believe to be violations of environmental laws and standards occurring on this property. Despite multiple complaints, investigations, photographs, emails, and documented evidence, the burning and accumulation of waste materials continues. At this point, I am deeply concerned that insufficient enforcement action has been taken to stop these activities.
The materials being burned and disposed of include treated lumber, railroad ties, Styrofoam, plastics, beer cans, nails, construction debris, and other potentially hazardous waste associated with the operation of the business. These materials create smoke pollution, environmental contamination, and potential health risks to neighboring residents, wildlife, and the surrounding forested environment.

I have filed numerous complaints since March 2024 and have provided photographs documenting the accumulation and burning of these materials. The waste is located well within the business property, and I possess photographic evidence showing materials being placed into the burn pile and actively burned. Despite this evidence, the owners have repeatedly denied responsibility. [sic]

Conclusions: On May 26, 2026, Lyndsey Rightnowar, Environmental Specialist and I arrived on site. We met with John Camp and discussed the nature of the concern. I asked about open burning and Mr. Camp stated that they have not burned anything in weeks and when they do burn, they burn only vegetative wastes. I explained that treated wood is not allowed to be burned in Missouri. I offered Fact Sheets pertaining to open burning and solid waste disposal to Mr. Camp, but he did not take them. Mr. Camp also declined to provide contact information. After a discussion of the concern and open burning regulations, we walked to the burn pile. There were some pieces of lumber on the pile, but I could not discern if the lumber was treated. There was also what appeared to be a plastic or Styrofoam cooler on the pile, but nothing had been burnt. I did not see any indication of burning of unallowed materials on the property,
On May 26, 2026, I spoke with Rebecca Camp on the phone. She stated that the lumber on the pile was not treated and had come from a recent cleaning project. It had been used for shelving and was placed on the pile in error. We discussed the concern and my findings from the visit to the property. I discussed the open burning regulations with her and advised her to pull the cooler off of the burn pile and to ensure that the wood was not treated prior to any burning.
Jesse Evans, Environmental Supervisor, and Josh Wilkerson, Section Chief, also had additional discussion with Mr. and Mrs. Camp. It was discussed what was and was not allowed to be open burned. The nuance of their home also being part of a business was discussed and it was recommended to only burn vegetative waste that originates on site if any open burning is to occur.
Jesse Evans also had a discussion with the concerned party to discuss what can and cannot be burned and how the department is able to conduct investigations in regards to open burning.

Concern No.	Received Date	Investigation Date	Suspected Source Owner/Operator	Concern Type(s)	City/County	Region	Inspector Initials	Final Action
66943	05/22/2026	06/02/2026	Jackie Ray Jackson Jr	Open Burning Open Dumps	Bland /Osage	NERO	BM	

Concerned Party: Anonymous

Concern Info: Web form states "On the Saturday of Memorial Day weekend, I was driving down Highway D in Cooper Hill, Missouri and observed a resident burning tires in a trash dump. There was black smoke coming from the pile and several more tires piled around the dump site adjacent to the highway. You could smell the odor from the tires as they have a distinct smell. As I came around the corner, the highway was obstructed by black smoke. [sic]

Conclusions:

66948	05/07/2026	05/12/2026	Barbara Vollmer	Hazardous Air Pollutant Release General Water Quality	Lonedell /Franklin	SLRO	ME	

Concerned Party: Anonymous

Concern Info: Online concern form received: "The property located at Barbara Vollmer 400 Vollmer Lane, Lonedell, MO 63060 Parcel Number 30-6-24.0-0-000-011.000 deed document 267-00963 contains used motor oil stored in various containers in and around the sheds, garages, and inside the large green barn. Barbara Vollmer also has used tires, rims, two old trucks, a truck camper cover, and several non-running lawnmowers scattered throughout the woods on the side of the property. These items are positioned near natural water resources, including nearby creeks and ponds, creating potential environmental concerns. There is also used old tires inside the natual resources scattered out in and round the creek/inside the creek proventing natual water flow to stream as needed. on the side of the land and in the back yard creek.
Additionally, there is metal debris and scrap metal that has been abandoned on the property for over ten years, contributing to ongoing issues affecting local wildlife." [sic]

Conclusions: No environmental violations were observed.

66966	05/18/2026	05/18/2026	Tidal Wave Car Wash	Odor Sludge	Ellisville /St. Louis	SLRO	AC	

Concerned Party: Anonymous

Concern Info: CP stated there is a strong dirt odor coming from the pit under the carwash bays. Also, CP stated the car wash has piled dirt (pit sludge) in the grass next to the car wash bays. CP thinks this is probably from cleaning out the bays. The piled dirt has a strong odor as well. [sic]

Conclusions: The MSD found no signs of sludge being discharged by the carwash, no odor coming from the carwash, and all of their assets in the area were flowing properly with no backup. The carwash's lateral line might have required clean, but that is the responsibility of the property owner and does not fall under the jurisdiction of the MSD.

66973	06/09/2026	06/15/2026	Jerry Dooling / Dooling Quarries	Permitting	Holts Summit /Callaway	NERO	DB	Report UF

Concerned Party: Anonymous

Concern Info: Online report states "I was contacted about a possible unpermitted limestone mining operation that is happening in Callaway county and was asked to send pictures and info to you. This person/company is fully operating and mining with crusher and sorter, equipment, breaking rock, stockpiles, etc. The whole hillside has already been affected. Possible stream also affected. Concerned about no mining, air, or water permits." [sic]

Conclusions: Operating without a permit. Issuing UFRR to require the facility obtain a permit. Water permit being addressed separately.

67040	04/15/2026	04/16/2026	Alan McNeil	Open Burning	Columbia /Boone	NERO	DB	Site Visit

Concerned Party: Anonymous

Concern Info: Caller reports that Alan McNeil has been renovating his home at 3913 North Highway PP, north of Columbia, and burning the construction and demolition waste. Caller stated that the burn location is on the north side of the house in the backyard. This has been going on for several weeks. [sic]

Conclusions: At site, found burned household waste and untreated wood. No remodeling waste identified. Spoke with resident, he said he has burned his household trash with untreated wood. He is putting up new siding he is manufacturing himself from untreated wood, and has used scraps for heat and to make sure his household trash burns well.

67080	06/15/2026		Caleb Roseman	Other	Kewanee /New Madrid	SERO	HC	Site Visit

Concerned Party: Anne Daniel

Concern Info: CP States: Neighbor has a fire burning next door since Friday June 12, 2026. They have dug a pit and are tearing apart trailer houses and burning the debris in the pit. This initially started in March of 2026 and has been an ongoing issue. CP claims to have reported issue multiple times. Says they are pulling in trailer houses and parking them next to their residence, then destructing them. They are burning all the construction debris and wire and everything else that comes out the trailer, then hauling off the leftover metal. CP has video of this happening. Concerned about air quality because they can hardly breath due to the smoke and fumes coming from the fires. [sic]

Conclusions: On June 15, 2026, I arrived at 35 1st St., Kewanee around 12:00 p.m. I was greeted by Caleb Roseman, we spoke of the recent extension granted to Caleb regarding the Letter of Warning (LOW) issued on April 28, 2026. Caleb explained that while he was away from the site on the previous weekend a fire was started on the property. Caleb was unaware of the origins of the fire. Caleb stated, upon discovering the fire he contacted a friend who provided Caleb with a skid steer to put the fire out. I observed both the burn piles produced by the most recent fire and the previous fire produced by the previous fire. The pile from the previous fire did not show any signs of recent burning. Caleb stated the only hole on sight would have been from him digging to fix the septic piping, which was damaged while using the skid steer to extinguish the most recent fire. Photos were taken to document site conditions.
Later on, June 15, 2026, I spoke to the concerned party (CP) via telephone. I asked the CPs if there was any other information they had to provide to aid in the investigation. I explained the findings of the investigation conducted earlier in the day as well as the process regarding the prior issued LOW. The CPs expressed their discontent with the investigation and stated the investigator did not observe the entire property and missed the area where the burn took place. The CPs explained that the Southeast corner of the property is where the burning took place, the CPs also stated they had multiple videos and photos of the alleged burning. Taking the information into account, I stated I would visit the site again on June 16, 2026. I provided the CPs with a text message with all contact information so they could provide me with videos and photos of the alleged burning and explained any videos over thirty seconds should be emailed. These videos and photos were never provided.
On June 16, 2026, I arrived on site around 9:00 a.m., I was accompanied by Tiffany Terrell who is an environmental specialist with the Missouri Department of Natural Resources' Southeast Regional Office. We were greeted by Caleb who allowed us to view the area described by the CPs, photos were taken, and no violations were noted. I thanked Caleb and left the property.
